this year, security camera?

(none of them care about helping. I'm
expecting too much too soon but it is
property i really cared about, all the
books i read reading notes. I'm more
upset about being used for Tobacco,
it's sad, i felt and then Isaac or my
own self felt judged for not giving him
all my money. And he didn't even say
thank you for the cereal and a part of
me doesn't believe he doesn't even
have Huntingtons and that the muscle
twitching is all an act. and no efforts
to help or collaborate at all, but I
shouldn't and never could expect
much from anyone.

1015am

Back and done with food

1107am

You need papers?

Then I laugh when he says no

Then he tries to get mad like he didn't
roll up in front of me last night and
deny

Dad told him he was a liar

You said that like I didn't need it, your
crazy he says

I stay silent

But likely look like a clown

Having fun today

Need to slow down

Probably triggered him a little by
saying "boo" in his ear before I went
out

She's Cherokee and I believe her last
name actually is truelove, weird
enough. Thought she Said turkey,
then talked about how someone made
fun of turkeys as implication for
snitches. It was the Spanish Irish
dude I wrote about , Seal who said
something about the matter and
Valerie said she sometimes calls her
children turkeys when they talk to

much after trying to explain its not an
insult. But why wouldn't she want to
encourage her kids to talk. I
understand it can be annoying as a
parent but to develop language,
help them become more concise or try
to pay attention and get to the point
quicker would help them

Could it be possible that something got put in my drink at 614 by person who stopped by table while I sat away. Usually pretty good at keeping my stuff on me but left my bottle for the briefest time on the table

"Don't get distracted"

Well...

Now I feel bad, I think he was really sick and I was upset at him for making so much noise. But when your sick is hard to empathize with someone else whose sick (because you're projecting your own sickness/ pain, when you should just focus on how to heal)

I feel much better I really think I healed a bit by laying down and listening to the convex album by nym

My leg isn't sore anymore. I just had to lay and accept and try to get back to my innocent/ naive state of mind that initially led me to really enjoy that

music without judging myself. And without fearing my environment, or needing to stay on guard (ofcourse losing my property is a big issue/ worry that keeps me from being more at peace)

Just really laying there letting yourself relax can feel vulnerable but not letting that fast restrict your breath and falling back in love is so essential, I think I got more rest and healing in that 30 min period than in my past few nights of hours more of sleep.

948pm

But each fb post gets me jacked into a mild state of fight or flight even though it appears that no one is reading, my mind still convinces me that a collective is reading.

But that fear to be silenced, or words getting used against us is horrible. The written word is so much different than the spoken. And yet the spoken is also liable to just as much misunderstanding.

Still...

Some may enjoy the silence

And I pray those who do speak can do it as compassionately as possible and if we can do that and keep each other from getting triggered into transference projection assumption delusions then we can do it.

Even those who do get trusted into a delusion I pray their words aren't used against them in their own earnest quest for self discovery. Because if we don't let people use all the words possible, and if we stop them rashly or blame them for certain words then we limit their own self discovery. Just to know when the conversation isn't helping either party grow.

Carl Jung made a prophecy

â€¢ Of a "turd" taken on the church? Let me find the direct quote; PageÂ 194

One sunny day, when Jung was twelve, he was traversing the Miinsterplatz in Basel, admiring the sun shining on the newly restored glazed roof tiles of the cathedral. He then felt the approach of a terrible, sinful thought, which he pushed away. He was in a state of anguish for several days. Finally, after convincing himself that it was God who wanted him to think this thought, just as it had been God who had wanted Adam and Eve to sin, he let himself contemplate it, and saw God on his throne unleashing an almightyÂ turdÂ on the cathedral, shattering its new roof and smashing the cathedral. With this, Jung felt a sense of bliss and relief such as he had never experienced before. He felt that it was an

experience of the æœdirect living God, who stands omnipotent and free above the Bible and Church.â€ He felt alone before God, and that his real responsibility commenced then. He realized that it was precisely such a direct, immediate experience of the living God, who stands outside Church and Bible, that his father lacked."

Besides one loud wailing dissenter
who cried in pain

1032am	Which its behaviors, ours collectively, depending on the mood/lens/label one chooses to view us, we are very obviously both Satanists and Christians, or Atheist and theists, agnostics and gnostic	135pm
Finishing last of coffee		Waiting for emx
Hour and half to diner meal		4 min. Eta
1142am	Or essentially: we are both partaking in God and bad, positive and negative behaviors.	How to escape my sleepiness st the current moment
Planning to go to diner		Did purchase insta coffee
Then shower?	Selfish and selfless are also two words which may come closer to the mark.	147pm Lillie busimrss center walk through , nice building
Sleepy	A totally selfish man still produces a waste product, now selfishness as rated by most toxic, non- sustainable, lingering catastrophe (such as a nuclear blast: negative behavioral immediate and longterm impact on individuals and surrounding eco system) now an average selfish man does a bit of damage if he's an American. Compared to the other countries, the selfish man there would have a hard time matching the Americans waste.	217pm
Noon food almost here		Knight library attempt to relieve, constipated 2 days in a row?
1220pm		Daym :(
120pm		
Next stop for day	So there are levels of selfish men, a hierarchy so to speak and quite literally. Non are speaking about modern slavery, racism and modern caste system.	2 students entered the dream lab just before me
Still haven't pooped yet...		Almost holding the door open in expectation or invitation
Missed out on laundry, need to do before 12...		But I had some self care to attend to
		My other jacket really sheds wrinkles well
137pm	1123am	
154pm	Well, I hope that means I have a fan	Still a bit backed up
253pm gotta go back to	The wall art at my sitting spot	Not enough meals or too much meat from diner
	And so many unique priceless encounters	Very grateful of their fancy service
<u>320_240320_163621</u>		Did not realize Eugene was better attending homeless than Ashland
Are you a Satanist?	That would have been great for recording	Very cool
Right here? In this space? Sitting by a tree?	But my ownbackup supply is so fickle and insecure I need to push for local	Still prefer the smallness and national park location of Ashland
To ask if something is something else, we should examine the context.		But Eugene has many mountains surrounding too
In some actions a label can have drastic effect.	1126am	
	1259pm	
Now just sitting next to a tree, what is my total impact?	Service station for shower	221pm
Well, collectively, participating in to the lowest degree(only buying food and paper and medical aid(wraps, Cough drops,)	Maybe not today	Still working on the inner [bowel] movement
	115pm	
Even my participating as such a miniscule economic player, even buying fair trade and organic	Maybe head to library	So much exciting material to share
	After buying coffee	Digestive cycle comparison to water cycle and other cycles, carbon, greenhouse gasses, composting food process, metamorphosis cycle of winged creatures
I'm still apart of the large cancerous worm of the society I live in	Atmosphere control already at the level of weather wars	

And our own self reflecting and reflected processes	Too impatient to absorb	958am
	Main desire is to share and commit to real collaboration/ action/ teamwork	[] To head to print out bulletins for discussion group minutes taken as well notification
239pm	247pm	
Even though I seemed to get 12+hrs sleep	To print out and post on bulletins	Then to post at libraries and popular centers
I still feel sleepy	That is the main mission to accomplish	10am
Even after 10 cups coffee	All else is excess time wasting transferring info person to person by my own poor language style	Bus late by a few minutes per usual
Can't buy more of that if it don't work	If the bulletin can direct towards open group involvement, invitation, co-leadership,
The meal at the diner was tranquilizers		Only 1245 but feel like I really need a nap
Too much, too much meat	436pm	Ugh.. even after so much coffee never did slow down enough to poop
Sleepy ever since	Hungry	
241pm	321_240321_180951 I see - - well, why am I in the group if I shouldn't get involved?	Atleast made one bulletin post
Maybe it's the music making me too introverted		Public library
Took an earplugs out to permit an internalizing of the external nodes in my surrounding environment I had mostly protected from via my own frequency/ music/ vibration	Not a very appropriate name for the group, "blessed brothers"	...
	When I say there's more fish in the sea, and to get one before this year's old fling gives him a hernia or kidney stone	Probably won't get any feedback
But now to accomplish	He says back "don't get involved, she's the enemy of the spiritual community"	Hoping it will
Emergency backup system discussion		Emergency backup systems
And the ones I have in mind		How are others prepared?
Nutrition, fuel, food		Nicotine panic
Aquaponic fertilizer for plants, Fish and insect breeding as food for them	819am	And treatment for such...
Closed loop self sufficient micro biosphere/ ecosystem	Sitting on bench	Interesting relationship
	Loud weed Wacker n train	My lack of filter may be concern...
Transportation as the next	Scratched hard for like 10 min last night	1250
And communication, archival and secure storage capacities for knowledge/ information/ education	Before I came to realization, or discipline	Just had to let belly rest after constant motion
245pm	921am	1256
Kinda vomity sensation at current moment	Waiting for shower at service center	Ever so slightly upset belly but manageable
	Headphones connection problem	Brushed teeth..
To direct		Apple bars and honey..
Vs seeming rude Co opting group	The curse of sleepiness	Should be good ǝʎꞤ ǝʎꞤ ǝʎꞤ

But the slight background vomit ðŸª†
 is just enough.. nutrition will assist.
 Like the ginger candies, but those did
 stick into teeth pretty bad...

1pm

Still 9 minutes to wait for emx...

Just holding my bulletin posts

Now to try to prepare for days of rain..
 um.. sadly white bird no extra tarp

Walmart 5 dollars for tarp, yet to get

Still deciding

7 minutes until emx comes

Feeling increase in appetite

103pm

A bit jumpy or cramped bad posture
 body reaction signaling..

Well... a bulletin post and a nap...

Doesn't sound bad.. feels like end of
 day... overcast glare all day..

Still 4 min till bus

So sleepy

Wtf

Trying to use this running record to
 stay awake, yay it came...

116pm walking through Lillis, I think
 emergency backup systems are a
 great business investment, long term,
 renewable creating more energy As
 time goes on

118p

515pm

Wow surprised I didn't write more?

Or it disappeared...

As I did sit at cemetery awhile then go
 to emu and post another bulletin when
 knight library did quick evacuation...
 for a smoke alarm.

Finally actually relieved Self.

Sad I miss food at diner today

Need tarp tomorrow maybe

5am? 0%precipitation Till then...

518pm waiting for just a maybe
 almost mile shortcut by bus. 10 min.
 more....

Maybe early

608pm

Nice peaceful spot next to this tree,
 ants clear out by 6pm, but numerous
 before then, must've found some
 sweet left behindHeading to service
 station

825 am bus was 6 min. Late

916am

Showers too full

4-6waiting

Full hour atleast

Smells like shit where I am must be
 dirty clothes nearby

Storage lockers

917am

Cool eye tattoo on employee of
 service center

But none of that is terribly relevant

Biggest need is for shelter this next
 week

During the rain...

My shoes being the most vulnerable
 part

To getting wet in the briefest walk..

1013am

Sitting on computer

1114

An hour to diner, but also

115pm might not be here for another
 2 hours

325pm

340pm

Conversations

First street talk matters:

Lsd mimics, research chemicals and
 dosage.

It should expand your sight, not
 narrow it

It should awaken and invigorate

Rainbow light trails on all motion and

845pm 2.5hr to kickout

923am	"Swagged out" laying with our blankets	Circle art ideas and videos to come
Qqqq a qqqqqqqqqqqqqqqq a a	We've taken the 420 park hostage	So many amazing things happened
	Here are our demands	2 baby squirrels were rescued after being kicked out of nest
11am	And speaking of unabomber manifesto	They were actually kinda stolen from Nemo who was right where it happened..
810 3rd monroe	With the young archeologist	I told Nemo (clownfish earrings earned him the name) the recent meme or tiktok video about how Nemo mom really ate all the babies and beat her husband before leaving, which is apparently more scientific than the story of the barracuda, "my childhood is ruined", after the truth was revealed
In front of old alluvium	Who desires to live near the borders of China and India	
His truck n camper	Captivated my attention	
	"Frozen statue"	
<u>324 420 p 2 days_240329_093245</u>	The modern ceremony, although fire is not allowed, we maintain our own, smaller portable, and the circle is maintained	
Great past 2 days		
At 420 Park		
Turtle from Shasta reappeared	1008am next shower is mine
What a great surprise		But so much to write about
"Stolen face" pickle is "a force of nature"	"That's the answer to the thesis!!!!"	Really beautiful people, excited to return with more in mind
Gifted me a hat	Weren't high enough and cared too much..	Oh yeah, alluvium today
And enforced local rules	Putting the Marijuana leaf compilation next to the question and hypothesis	And the story told by Michael AKA hawkunany about jabi or alluvium founder accused of
Finally shower coming up	As a solution, for helping care more patiently and compassionately	By a (reddit thread comment on psycho women rumors and vice versa, no sexism intended for widespread domestic issue of fraud, defam,)

Some proof of conscious creative action

Trying to be okay with, and patient to heal

From the root disease: house-less/ security and pseudo-community lack of real reliance on each other and lack of meaningful, accessible, higher personality developing occupations/trades/skills

So, keeping this in mind and proving one's discipline, trial and error to muscle memory: right thought/word/actions which maintain whole body peace, health and equilibrium. (Repeatedly "Falling away" from individual tensions/fixations which are my body's weak points and distractions from center/breath and a rising and continuously releasing tension (letting the tension start and end in breath and not in an isolated part of my body, but if it does, to be there patiently to heal, exercise, hold space)

Easier said than done. But each of our individual tensions are in fact effecting our own neighbors' tensions to a greater or lesser degree depending on their empathy/susceptibility/awareness.

So literally healing oneself of impatient, inauthentic energies/fixations/neurosis by remembering to relax into each space comfortably, trustfully (this is a key to group health too. If you can find the trust to fully relax and (vascularily?) (Blood pressure/stress) open up to the surrounding environments input.

Still though, I maintain fixations/guards/protective-walls and I myself am at one point [(and now I shall stop, as the uselessness of trying to define myself again, question or....)]

Is all comprehension/consciousness a matter of an "identity crisis circuit"?

Which could be better named as "identity adaptability, growth, progression, review, etc"

 Grant.

[] 9am White bird (6th n polk)
 supplies:

[] tarp,

[] wool blanket,

[] tent,

[] sleep bag,

[] socks,

[] Toilet paper

919am

Not really sure how grant would come
 camp (i didnt get enough food for him
 too and would be too heavy to pack
 anyways he doesnt hace a food stamp

card or anything but whitebird will
 give him a pack)

Ashland is definitely preferable to
 eugene. The 420 park is the only real
 vommunal space bearby

928am

Now that i dont have smokes of any
 sort the 420 park is whatever i hate
 mooching and dont really enjoy BS'n
 with the others

 that's true

550pm will feel better once tomorrow
 is over, but

The sabateur, Daniel has been
 frequenting all my spots with his
 psycho babble, which is just so
 unusual and seems very obviously
 fake, in that he knows what he's
 doing and intentionally talking without
 stop, but on memories easily recalled
 and able to appear as nonsense (in
 context to the group conversations) as
 an act to appear crazy and also to
 interrupt any attempts at peaceful
 background noise or other
 conversations. It doesn't work very
 well to others, who seem to continue
 regardless, but it does seem
 obviously, intentionally loud to
 disrupt. And it is just plain rude when
 he continued to come closer and
 closer the night of Saturday despite

my requests, but he did eventually sit
 down to himself and stfu after me and
 Michael more directly addressed his
 poor social behavior to his face.

629pm

Welllllllllp. Wish i was in Ashland, just
 way more comfortable than here,
 miss the park n people, should bring it
 up to po tomorrow, about the fact i
 shouldn't even be in Eugene, was
 arrested on warrant in Ashland...

What a stupid thing

Something i am still struggling to process

Here are some [destructive/ painful] thought lines

1. It's selfish to brew over an event?

2. Where to go with it once i do "accustom"/ acclimate/adapt. Where to go with it all::

Go to "life matters, is sacred and live closer to ideals before the "due/ expiration/ death date" as if the whole process and the whole of life is a painful forced acceptance to let go of everything.

///

Wtf, the presumed, living in fear of loud noises, trying to blow us away, wow so loud, leaf blower

836am just writing and writing, like when the prison switched to ledger/legal/ extended document lengths.

..

Where does one's memory go to and fro. If not this moment. Over excited by the simplest thing. To write, to take back or try to take control of the conscious stream.

As if the smart phone could do so much. If we hope. If anything can.

Jealous by proficiency in its use, i can create anything with this. But instead i just write poorly. Caught in a trap between documenting a running record and trying to perfect it:: "publisher woe" archetype/loop: making excuses

Oh but excuses exist.

For a good reason, are we allowed to keep mental privacy?

The day when that is eradicated? No private place for man.. if it is or ever was so, private or always dispensable to ...

///

As if i look disgusting here, or so i believe the city person is transferring, while walking through middle of group

to blow air. A great mass unable to understand our youthful affliction

Our disagreement

Our seeing the futility, pointlessness and waste of the current system

Which when you're in, conforming makes it all seem so normal, acceptable, okay.

...

Already having dealt with the worst negative broadcasts in prison, almost nothing can compare. So most all insult

...

850am so crazy, it's unbelievable, as if using my phone is an insult to someone o

...

Wow that fucking leaf blower is so loud once its done its going to be so nice.

Unable to fully

As if control of facial response or body language is infact coordinated with environment without any conscious awareness. A realization proven by introducing new subjects and watching body language as whole environment shows some subtle response or acknowledgment... so basically, it is not so far fetched to believe even facial expressions meant to communicate can do so without intention and to persons demise as they fall into old programs/experiences

...

As if ita my job to respond to whole environment. Park blocks cooled down, less noise now im just hearing the environment make its own

Like a recent trucks exhaust.

How that loud noise and its whole purpose seems an irritation with everything it surrounds...

Yes i can actually feel my face change based off perceived judgments or sights from others..

Remembering that nick was like a yogi and could actually sit with his legs fully folded full lotus onto itself...

Able to feel, a

To sit the whole day

Beinf a medium dor breath

As id rhe park bloxks are "too hot"

Always givinf people space

Always about "respecr"

Moved to memory of interaction at bus stop

Just a little weird with bare foot

Weird how bipolar that is or we are

But we just come from different worlds..

Advice to woods. Sounds nice.

Except - "burnout/deadbeat" archetype as if i havent always created something nice.

Oh ew, ego. As if. What a statement to make, i wonder who could think such things about such a horrendous person such as i?

Okay, back to reader and all readers and education and healthcare instead of prohibition and gangs/ warfare

920am

Funny actors and actresses

"You lost the priviledge

..

"Its all about me, Let me talk about my life story," nanana booboo

"Its not that your tweaking, its that your loud"

A lady goes by the name crystal and is trying loudly to create a something...

..

Well getting closer to the locals or making friends or memories or connexions of some sort isnt so easy but i think just by apensing time around eachother . That alone is enough to begin to like and see one as family, just proximity. Thats why its so important who they force to cell up and how our governmwnt uses blins to betrayal ahainst us.

Because we are easily blind and can stay in relationships with partners who are obviously not really interested in us or our projects or dreams.

This is a huge issue, sponsored by the lack of housing options/alternatives to abusive partners..

930am

Reminded of ... acid burp pain horrible. Such a time stopper.

Health.

...

Well this ladys broadcast is taking over...

..

"Its all on camera"

Well good atleast,

What a drama, so much contxt mising.

Bare talking about under cover cops in parking lot and park

Ofcourse, sure assume many, hope theyre good and hearts in right place just like any of us.

Really looking for the truth, and not too prematurely or rashly...

Wtf..

..

Well this is their form of public safety... to make a space uncomfortable so no one finds peace or unity (sure it wasn't happening, even when there is space to speak.. but that's because there is a real problem with "broken ears":

How my communications have not landed me a real reaponse from someone important or auccesful or seeing the true potential in what i guess is like a regurgiration of jacque fresko or bf skinner.

Okay but i did compile necessary info with graphs and couls still do more with that as outreach attempts (if it/real motivation comes back)

So its like the city is stuck in an endless loop of needing to solve an issue

Once the issues are resolved, we have time for peace.

But, there is an excess of illusory issues taking up peoples time and energy, all backed by the coffee culture go go go attitude.

947am

I met all the requirements

A positive dream recent

to encourage some doubt or
superstition amongst my local peers, i
presume based on subtle challenge to
maintain the work, and to not just
zone out or vegetate into the
overpowering deadmind field which
makes it comfortable to let go and just
ride along.

Why the writing of the word is so
fearful to those never held
accountable.. not a scare tactic,
individuals should stand for collective
accounting at city level before and to
encourage more humane individual
accounting. Some individuals run
collectives so those individuals need
to be accounted for if collective, in-
depth footprints are not positive.

Spending hours writing on my phone,

The sermon stopped as i began typing, though.... 704pm

Tiny doggy, the park was very busy today. And multiple gifts of food from passers by

The park is so beautiful, so many beautiful people, some day i will better express my most authentic, end of life considerations. And i will embody my highest self ideals.

Please have patience with me and bless me with opportunity to succeed in finding where my talents and passions can be of use to my community. Where I'm/we're all seen as valuable, and our natural inclinations to assist, collaborate, bond, toward our agreed upon goals. Which have been more recently updated and should be again reviewed the 1999 Declaration and resolution on a culture of peace. To see if we still agree. I think so, the goals are pretty desirable/agreeable even 20 years later.

Uh oh my typing has killed the buzz, i believe, as groups move and it quiets around me. Or its just a coincidence...

I wish i could do something more exciting/ attractive but maybe silence is the best way to convey how extreme/out-of-balance/wasteful/death-accelerating our current system is.

Weird people or retelling of a suicide story by Hannah where she laughed when she said he last bf killed himself by suicide by jumping off the parking garage.

She laughed as she said, "his head exploded like a watermelon"

So i thought it was a satire joke, or ruse.

I did find a gofundme for the name of her bf

But that doesn't explain much.

She said her mom told her it was her fault.

I guess, hysteria? Or, that's how normallized/detached/dismissed something like suicide has become.

The simple question

Why are they killing themselves?

1. Depression is real

A. Cross contamination (measuring depression from a sociological and biological perspective)

i. Cognitive dissonance

li. Heart math

lii. Poorly regulated government going against natural design

Iv. Lack of "know how", informed consent and Human Body(s(inner, inter, intra, outer) Operating Manual

Otherwise, peaceful, yummy food from food not bombs, potato veg burrito. Ants found strawberry tart, left a big chunk for their colony after crushing probably 100 or so slight upset at losing the tart but prob didnt need the sugar as it worsens the oak itch and rash i have noticed.

Careful not to let it spread anywhere else.

I should take video of the ant Clooney i sleep by and which does not really interfere until i begin waking up and disturbing them, then they send armies of angry butt raised red ants. Would be funny video of my ridiculous pursuit of flicking 1 off at a time, when this colony has millions to dispense and even winged managers every so 100 or so tiny ants.

The colony doesn't begin until the sun rises but it completely engulfs a massive portion of this fir tree.

Instead i videos the inch worm paratroopers en masse. There must be so many of these green worms to see so many at the same time, unless this was their day (of planned or temperature and humidity requirements (wondering how they all wake at the same time, first 80 degree days maybe of the year had to do with it))

Unintentionally carrying some straggler ants from the morning antics.

These events, more amusing than anything, peace and quiet amidst nature encourages bewonderment/bewilder

Had strange nap dream of uncle joe impersonating or receiving credit for i hope a faulty misunderstanding/ translation/ diagnosis of my published works.

Strange to see family

Or obvious astral reception of broadcast and integration into self awareness

Had nice dream reuniting daughter and ex wife, couldn't recognize luci kenna commented, we were at Eloin.

But all those childish programs, or dreams of my reliance or wish to collaborate with many who remain uninterested or unmotivated to join in something (more than simple grounds maintenance) celebrating the "higher"/ liberal arts of each culture. Music, food, song, dance, art, traditions, recreations etc...

My own fault in the matter, i don't reach out enough, my own learned helplessness.

So, climbing out from the pit of despair

By simple changes to create new routine in effort to re engage in prior petition and other works..

Simply, what i meant to write was how motivated i feel and how sad but amazing it is for me to remember the dream and the work I've done and can easily continue doing. Its like 420 park just wanted to kill my petition, which they did and its about time i accept that they'd rather naively, ignorantly [without proper education or planning] initiate a grid blackout instead of backup the very thing they are against. But the petition provides the opportunity for collaboration with other systems, cultures, etc and from the research, collaboration, social rewards, is built in, [so the worry or hesitation to collaborate is more based on the fear of what there is to lose]. Its modular (i love that word). But collaboration isn't so easy, and the paranoia which so understandably pervades that group/class (obviously multiple variations exist some more harmonious, communal than others...

131am as if, likely, I've been challenging some great and powerful thought adjustors for some time. And their fixation on things lacking evidence is evident of their focus, not mine.

It's like i had to sleep these past few weeks, months, becoming a lot lizard or statue at the park in lounge mode... because the real threats of gang retaliation or worse, as i have named so many, those threats seem to dissipate or actually since no one else takes them seriously i don't either. But, As if i have any security? So how i just hypnotically engage is strange. Now, awake to the possibilities of multiple different groups targeting me, and a government playing ignorant. As long as im ready to run, i guess.... sleeping with shoes on again...

It's weird, i can find my writings more comforting than the literal graffiti i have seen which is like a negative attack from someone, or could it really be conditioned into my

subconscious from prison? All those gross reinforcements. So petty.

Thinking i should get sleep if i wanna town n back but unsure...

155am

Apparently,

The sleeper you get, the harder to pay attention for long time.

. No i forgot what i was gonna write

Oh about my lack of light speak and how even attempts to be objective/ analytical

Become contorted and confused as insulting

Or romantic

The science of nature is quite majestic, profound, relatable/ transferable and nature is BEGGING FOR COLLABORATION

As she dwindles away in a health state that makes her 100 years ago (animal migrations, air and water quality, temp extremes etc) look mad max desolate.

(See i fell into negative, and something that has been covered in so many ways by so many, it's almost a joke to have to write any more. Those who know, know that so many don't know but there are definitely millions ready to join an eco friendly govern./ country/ group

7am early 430am start...

donno if sat. Market or not will consider Still 1.5hr to bus

830 4 hits,

Just the silence alone is so healing oh my god

Well nice lil bird chirps, water stream and a clicking insrct or bird

No more wirring cars even across the river from spot last night, still..

Just nice to think for self

And dream big.

Despite the worst

Never stop dreaming.

The light is dim but i remember when it was bright and blinding, and just knowing how much i loved spending time in nature. So blessed to live so close to woods. Many today's age may go their entire life without hiking in the woods.

So im tired, and lost sight or immediacy of manifesting. I could work harder to petition but kinda find it an insult, hassle, just the slow bureacratc process of making changes at a systems level.

But, the people should/could govern selves with proper communication system. But many may be comfortable in their sleep coma, automated repeat life path (reward for survival, slavery)

So it did re ignite. And thats good to note. The ceremony/ritual of retrieval itself was probably more important/impactful than the prized substance itself.

And iam obviously adhd not depressed

Because when i sit for some time alone i see so much great potential for all this work/bleh. But then i am waiting to feed off the same inspiration from others. But when i hear or assume my dream is incompatible or undesirable or generally not inspiring(even though it's not even my dream but a collective civil/ human rights address, which the courts are so good at putting off and making a socio-emotional manipulated theatre of such pointless BS in objective comparison to the collective crimes of USA private investors (trumps trial is a show, with so many others, why they have not implemented real due process, such as mathematical logic and scientific research with results (humanism)

...

845am...

And so i let Jesus use me as a troll for their own ends

Or i can so believe this whole charade is beyond me, such as the laughably serious consideration that somehow being gay might solve my problems (im pan-demisexual, prefer natural unique beauty to cosmetic doll show - but have trouble being physical intimate with guys i assume brother n father influence on me. But i can and do enjoy consensual physical embraces or just showing attraction...

But i have so much shit to do, relationship just distract me more.

And the tool to focus!

852

Truly, fellowship is the best motivator for most people, i think it's so natural how others excite and energize, if only we could praise this natural joy n put it to some crazy amazing, inventive, ground- breaking work (alt. Housing, eco- friendly and local self. Suff. Economy creates jobs n peace)

1131

So at mckenzie district fire station for the night.. or until something better/smarter.. idk i guess fears arent taken seriously, its just assumed that my fears of being gang stalked are not real... fuck. And so somehow i hypnotized myself. Oh my fears aren't real, thanks

Even if the fears are based on things not just happening to me, but so many others.. its like you dont even have to believe me, just see the

5417263714 springfield cahoots... doesn't come this far...

Light speak, self improvement, bleh, just being manic like nate i presume the judgment could be made or i myself just made it..

Can't get out of "me mode" poor listening when basic needs not met..

1213 as if my stick at the fire station is "barbaric"

I dont ever want to use it but fear if someone doesnt respect my space i will use it (like trying to touch me or just not listen to my requests to move

away).. better to just try to leave. But i like this spot

The horror of being in the woods with no knife or defense of any sorts except a fucking stick. Like holy shit, normally i feel way safer until camped next to.

Um as long as i can idk i do prefer
 being in nature instead of a noisy
 concrete jungle. Im fluid, open to
 changing if the environment unsettles
 me I'll leave and find new one but it is
 really awesome this ltd route and
 privilege to do this. I just wish i had
 service on it cause i have no weapon
 to defend myself if a group were to
 rob n injure me it would be easy.
 Multiple people i meet at the park, hit
 while sleeping and robbed bags. Even
 in Eugene, and police can't help or
 even care when the homeless are
 robbed of our most basic necessities.

Still looking for basic security as a
 means to further my goals and
 direction and focus. But i am being as
 patient as possible. So many others
 have been waiting for housing and
 security longer than me and I'll get
 better at being
 homeless/homefree/faithful to my core
 beliefs as a universalist. Wish i had
 more Christian civil rights friends who
 cared about me, my work and
 collaboration. Almost asked to
 volunteer at Christian church in
 springfield for a room or place to sleep
 at their church and to collaborate
 ministry but presumed they wouldn't
 care, as i have found many to be in
 disbelief or just a coma like apathy.
 The Americans have recieved an
 academic judgment from god and
 continue to play dumb theatre dramas
 in court instead of saving lives.

What a waste of life, let's watch a
 Trump trial while your economy
 sponsors genocide. Good job USA.

But the people are ignorant,
 uneducated. The academic students
 know, and i am so happy the Palestine
 protests started on my birthday.

It was quite annoying to go so far out
 only to have people camp so close and
 talk and just keep me on alert. I'll take
 more photos to prove I'm not
 delusional, sure i remain skeptical of
 my theories as anyone should and can
 be wrong. I do not ever hear voices

that aren't there, my internal
 disfigured is silent, audible noise is
 quite apparent and my professional
 work as a recorder should stand by my
 ability to discern

MOMENTS OF INSPIRATION	The place of feeling. Some say begins in the head.	They are forcing me back to Eloin
ARE MOMENTS OF INHALATION	He thinks the heart just pumps blood	Which i would not be so against
RESPIRATORY GEMS, MOMENTS OF ECSTASY, MOTIVATION, EXCITEMENT.	Memory by heart,	Is Eloin ever reached out to me
...	do we remember most what we feel most?	To make me feel more wanted
Hollywoods influence on the night and shadow realm, and collective sub/un/ conscious	...You don't judge a person by his words.	Or less of a burden
Really I've lived an extraordinary life, also embarrassing at times, success and failures	You don't judge a person by his actions.	Or actually helpful, and needed
To judge someone as good or bad is to neglect the model, the ecology of the soul,	You judge (or were judged by) a person who BELIEVED were the words or actions.	I love Eloin, but question the inability to communicate or collaborate effectively
The spirit can transcend sulfur and salt	But the Bible says to forgive or you won't be forgiven. And the cc context model, ecology of the soul gives a humanistic tint to understanding the multitude of variables.	Which, yes, we did, beyond my own comprehension.
Personal preference to mercury	Are you anti-human? If you always blame the individual instead of the circumstances/ situation/ systems?	Oh words.
I'm not a santaist or a satanist im a saturnist	I think Jesus was able to forgive everyone because he had meta-cognition. Or ability to perceive meta-systematically.	Not the same magic as the love.
The symbol was changed from an h to an h with a cross by the church	But when you're living in survival mode, without proper sleep security, you cannot blame yourself for being selfish. It reduces cognition, you enter the NOW of basic needs. Selfishness comes and it goes with our sense of security.	The love of possessing my family.
The reaper is a friend of mine, but i have a question for him: who are you?	If we increase security we increase collective health.	That's what people want to see.
And where did you come from?	///	To see me fight for my loves.
To bless or curse your circumstances	242pm	...
And maybe he was a miracle child	The portapotty is nice privacy	So basically,
With the love to survive a barbaric treatment	Still feel like for some reason	I thought i might get housing in eugenr
With utmost honor and value	I'm on someone elses clock	Or somewhere else.
And so he is allowed to judge	...	But this whole time.
For his special ability to transcend	But god, even though it stinks. The privacy is so nice.	Ive been manipulated to be forced to stop avoiding my loves and to just let the sober tension/pain/emotion move me as it will.
Made him lack the empathy to understand the common failings to encourage resolutions	Yet they destroy public restrooms. Because drug use	Instead of transcending family relations. Or some spiritual monk magic shit.
"The stumbling block will be removed"	243pm	Why should we ever leave the family?
Some say, only god can judge.		Unless we disagree?
Ancient texts often put god in the heart.		My own writing is so far off from love,
		I feel a conk in the head.
		As if the world is waiting for me to speak/write something better

You don't judge a person by his actions.

You judge (or were judged by) a person who BELIEVED were the words or actions of the person judged.

Now i love the quote, "there is no such thing as a true belief"

promise, i thought it was mom cause i
told her my plans then gave up, but
her reply was so disinterested it made
me feel...

What's up

Oh fixing the sink in the RV this
week....

And then i just let it end, low battery..

Dad said it was just about love

I said that's what love is, the family

He said "no, no, no"

Or, "impossible, you can't change
things. That's impossible!"

And the whole time,

My passion

Could seem mean like anger

And my dad, he admitted "change is
scary"

I was glad he admitted, because i
said, well, people only like love when
it doesn't ask much of them, but as
soon as it asks for change, they
withdraw and say its mean or scary
out of fear for control over their own. "

He said his foundation was love

But i asked what was his concrete way
of showing that

I asked, why isn't the family working for each other. He couldn't handle such ideas. I wondered why he didn't like the farm or anything that made me excited. Why doesn't he want to paint pictures with his child. Like i do. What's happened to people to not enjoy this short time with their family?

And so we were turned up, or my yelling scared the whole town.

IDK i kinda don't give a fuck right now, which could be bad, but I'm respectful. I will be. I will help one understand how love can seem disrespectful. How Jesus could seem such, to the current operating structure. If only i have the strength. The will. Oh well, my dad was looking forward to tonight for me.

I had thought he was gone, and out of worry conversed with him. Only to discover he is not interested in anything except his Coma.

He tried to say, he was just in the moment and all mathematics and science was pointless.

I felt so disrespected, good have us the ability to measure, the rod,

So, how can i stop being so half assed

And furthwr my goals as much as possible

.. eloin always tried to do the very thing dad was on, about being in the now forgetting Math, science and the record.

Well, I've almost smoked it all. Will be nice when it's gone.

I need to do what i wrote in my abolitionist show, i need to find an easier way to go person to person, maybe a billboard style cardboard. I probably only have one more bus ticket worth.

I told dad id do better with drugs because people giving up on the dream makes me need to get high to remember it is so possible and so desirable. The dream being world peace.

Anger is a form of love. People are scared to change. They don't like feeling like they have to do anything...

People want love ro just accept them

But change is helpful. People interpret the request to change as meaning theyre not good enough. It becomes a judgment and they say dont judge me.

So what do we want people to do

Oh my god, that sleep helped so much, so ridiculous how much of a trip that put me on, and the unfortunate credit goes to a bottle of wine for assisting the sleep.

Glad the cops apparently let me sleep there til 1am

So much happier with ashland after talking to dad. Its like that changed the whole dynamic and i was comfortably angry.

The devils advocate

To protect the children

Selfishness is promoted in the firm of style protection for the children who are too often abused by their parents

To liberate the children by allowing them to express their true feelings about their family who neglect their situation and worse.

So actually people are all quite satanic, quite selfish. Naturally, without thought or intention. We are all children of psychopaths, programed by a militant, dominatrix society. Our parents, their parents. They exist fine in society, conforming with each other, all the American psycho paths. But, now is time to wake up to life.

Larry spoke of the shootout

His hair looked like an attachment

He wants justice

But he thinks that time is how criminals learn. Like locking them up in an expensive closet that makes them less trustful and exposes them to a variety of harmful voices, eradicating the inner voice and overrunning it with triggers, hate, fear, etc (yet even if someone is actually infact trying to hate you ____

He's like a bad parent, neglecting his child's need for attention, understanding (how were they really wrong, what circumstances created that action, can it all be blamed on one single individual? Hilarious, so unscientific. So obviously wrong. Your idea of justice

Clint left before i finished in the bathroom.

Haven't pooped for some days, strong observation. But i know my hearts really strong now. "But you promised me." And i came back for her, i apologized for my delay. I gathered a bucket of flowers. They wanted to use the law for bad, they wanted to arrest for picking wildflowers from the city of Ashland. How petty, i imagined. Or for saw, and prepared. Dropped 2 blue beauties and kept the 20 or so "ugly flowers, that belong to the national forest near acid castle."

And then they wanted to arrest me for advertising with my cardboard sign. Even though I'm a nonprofit, i don't make money from the matter and what about t-shirts?

Oh yeah, and "video harassment" while advertising my documentary.

Getting hungry...

Oh now i understand why they kick the homeless out. The pedophiles in the city economy are scared of a homeless man. But this homeless man lives by consent, so as long as you respect that, and you dont hurt then you have nothing to fear. So I'm a guardian for the city, the nation, the worlds weak and easily taken advantage of. Just like you'd hope somebody would be.

But actually im just wandering around under your gaze which becomes uncomfortable. And the only reason you fear me is because your terrorist city governments gave me a bad script (a criminal record, which is inaccurate and makes me out to be scary...) why do they create these bad scripts?

Can an individuals willpower overcome such a huge force (the local records)

Yes, some more than others. But we should teach all to strengthen their willpower.

And yes there are a lot of registered sex offenders in oregon, i had no idea how many. I forgive, please continue to work on respecting others space and always get consent. I'm a teddy bear

How to strengthen my willpower to overcome false authorities who operate without law or consent?

Tricky, annoying, uncomfortable, that anyone should have that much power, the citizens are ultimately responsible for sponsoring it.

The federal government can't better relate city governance can it? That would be nice.

Everytime i write something i can see how you might take it wrongly. Thats such an easy thing to do. I need to work on universal language and the most accurate words. But words are so abstract

If you guys won't let me have any privacy, even in the bathroom. You need to pay me for the entertainment. 412am the lady of the club immediately asked if i knew the kid with the dog

She said he was cute

I was already worried about him or why he left before i got out of the bathroom. I said id be back. I was hoping we could inspire each other. He said he was writing a book. I said i would help and i wanted him to help me and inspire me to make videos and continue our passions. I said the point on the commandment to not kill which i explicitly teach while

Its obvioushe said people had been following him. He said lima was underage? They extorted him. They

were using him as bait, and when it didn't work (the gang involved with lima?

I think when he tried to say prison in louisiana wasnt bad.

Idk I'm trying to map this.

And i need to poop.

Oh yeah. I remember a loud woman, while i was in porta potty. I remember an [intrusive thought (it just didn't make sense to my duration or what i was doing. That's how i first mske my distinction, "they don't believe her", and it reminded me of the woman on the bus back from Walmart who sat right next to me on the phone, whining the whole time on the phone and i thought also it was so over dramatic and she stopped on the phone and would listen so i don't really know. I presume more gang stalking, sure maybe it was unrelated but the two events are so similar. Hopefully the records from the bus camera still exist as i can back from walmart that day. She was Hispanic, overweight, and i believed she enticed a Mexican gangster to board, who i felt was actually scared of me which was weird, the intrusive thought from him i got was "a friend of the devil is a friend of mine" . Its just unique when such phrases pop up. Maybe my subconscious was actually saying that about him, but maybe also, he was saying it about me. Now upon consideration, maybe he was a sex and afraid of me, the Mexican and maybe even clint, even though i was so happy too see him. I want to

But i can be passionate about defending my daughter and other children

And i expressed it

And my whole media channel could scare sex offenders as they think I'm ... (its interesting, I've never heard such things, you superstitious religious wish to prove the devil exists, while you hold his hand (the superstitious observer monitoring my current typing, is effecting my typing style as i continue. Because they're reading along and then making an assumption for the next word, and if I'm not careful i will accidentally add or subtract it.

So how much is surveillance effecting this. And where were they in this matter.

And i assume biden has the audio and monitoring tech, like a bald eagle.

So i have made that statement, i have requested surveillance.

...

The source, the real cause? When i was indirectly Claude

414 can i please have some [privacy]

442

There's too much activity and watchers around me, i just need the privacy to feel secure to poop. The predator gaze makes it hard.

Proof: clint is my friend, he sent a fb message over the matter, that i made him feel safe despite his being Gang stalked

He said something about seeing a cia ID

so fb and the cia subpoena in the case of something extreme.

Also, to investigate the potential gangs associated with Lima, and the idea they used her as bait to extort him more?

He asked if lima was over 18, i said i didn't know, but if she wasn't, it's the cities liability and responsibility to keep underage from such things. She was around that whole year i wasb here 2021, i went to the bmx park with her once and videod her going on the jumps. He said "now I've seen your teeth" when i spoke about liking Lima, which i questioned but he refused to explain more what he meant. He was only with hsr 2 weeks he said. I wonder if he hurt her? And thought (from fear media paranoia) that i would eat him or something absurd. (As if the government or some group created the idea that i was a protector or type of being that just engulfed creatures whole, like my snake. This is under the idea, or symptom, based on others wild imaginations, not mine. That my apple and snake video and others are more than just documentary and fun skit.

And so their power of belief is stronger than my ability to gain their trust in such a short time period.

I really hope he's okay. The owner of that dance club really spooked me with her question about him and his cute dog, which i said had one eyrle, in response. That dog was cute and rubbed up on me for affection. But itv was limping and clint didn't respond about its limp.

I wonder who clint really is, i feel bad i might seem judgmental to have done so much when even a normal person with a home hasn't, let alone a homeless man.

He said he wanted to party and was worried about waiting for the sun to rise, 4 hours worried him. He was waiting on others, as they made bird whistle noises in communication, they were using him and communicating but i don't know about what.

He did join a gang in louisiana he said also he wanted to party but i was kinda suspicious and told him i wanted to wait to get to know him more and that there is a lot of time.

I told the lady who owned the club that she looked like shira who she said she didn't know.

I also saw Kevin for the first time in a while and he asked if i was Joseph after vhe made an ssss noise. Like he was about to say spencer. I tools him my full government name is Spencer Joseph Barrett.

I would be really upset if they, the surveillance state, had an agent reading my writings and trying to shape them. What if that agent was a child molester and kept trying to project his evil onto me. Everytime i write now.

So subpoena the readers of my free flow writing, those given access without my permission, to distort and corrupt with their own guilt or paranoia or whatever the duck they're running on. Do they really care? Unlikely, or more like they don't have a real education in psychology or drug use or sociology. And they're just superstitious idiots who can't try to discover their minds for themselves, they have to listen to someone else tell them how to think. Good for them, obedient little idiots with a false sense of self righteousness (the readers and channel changes of my texts) and it can all sound crazy until you realize i did request surveillance and report numerous fears, while they try to

and see how there own interests might be so obviously corrupted by

false Intel, false direction, lack of education.

So many adults lack an education yet still vehemently, violently pursue others as if that would ever solve anything. (These agents, pursuing me as their nightmare, because they believed a fake news, fear media conspiracy.)

Yes, you watchers, readers, who have yet to test your own susceptibility or mind. They are the child molesters (the surveillance thugs who get paid to watch and alter

And i assume larry is involved. Who i met at the coop, and who bragged about his extensive heroin experience and triangle gang and clint said "i didn't know he ashtay told you" about a shooting between two brothers, mom and woman who was injected with a needle. Something violent, extreme, seemed out of context to what we were taking about, as if he just needed to share that.

And i became worried about Becca and the brothers she had sex with and both their children. But that's just what happens when someone lays out a story (i can see a pattern, which was the pattern of relatives and drug using family) but i often fear for my own family after hearing a story so drastic and feeling the fear involved.

Your thoughts are not my own, (watcher, predator, uneducated editor, faithless creditor, money motivated)even if you're working i know what i believe and feel. And the gross echoes of prison were never something i identified with, ever. And so i can more result become aware of intrusive thoughts.

530

My use of medicine is not hopeless.

It is a way for me to transcend the polluting collective and intrusive thoughts around me

Who do not believe in the collective dream or work towards its establishment/ foundation, who are content with the current eco cide and genocide, and punishing their neighbors and children.

That's why i enjoy the forest.

But even there, it felt spooky that anne was so adamant to stay away from the others, just making it a Shame for them to go to town or work on the outside world. Creepy and rude, i told her part of me was outside the comings and i needed to go outside. That part being my daughter. But I'll give her the benefit of doubt and say she was just really attached or enjoying our assistance on mundane chores.

I do really love it in a sense, but i love the outside world, and plant medicine.

...

Strange to have a bottle do right here behind me as i poop

Actually really weird that we are so close. This building can easily spy and see inside this porta which is rude and gross.

But for some reason the loud noise is helping. Is just kinda weird to think forcing constipation on people is cool.

With loud b insecure places.

My stomach really hurts.

To be able to feel more focused on writing. Like it really matters.

It's nice, no i have records of similar writing style.

You can't judge it so hardly. It increases the efficiency, speed, commitment. Its performance enhancement is important for our being

Actually kinda funny he's breaking glasses right now

Like he really had to come to work 539am to throw glass around .

How rude, i need to get a picture of him.

Love is not a specific drug.

It is logical and apparent.

Much of what i say, there is a truth, and a context. It's nice to articulate.

Look at all my past work.

Oh but you don't believe me....

Wow this guy is so intolerant.

And rude.

How would a real Christian act?

With such horrible noise at such a time. Wow. Like I'm really that important to you.

I wish i for a picture of you and your truck. You are lucky.

546am

557am

My stomach really hurts i need to poop but i can't relax.

558am

Wow

If people think they can really avoid "shame", by regular pooping from a faith diet. As if conscientiousness only works from the gut movement.

No, we have hearts and brains and a whole body. And toxic waste is a real issue. Ventilation is important.

Make up whatever you want. I have hair sample from past and i want full analysis.

It's not so bad to smoke Marijuana for me.

Some are against it.

It does help white guys dance.

But it's not necessary and some prefer not to see as such.

But i think it's obvious there is a great disease of depression and other issues. And Marijuana helps me.

I naturally have social anxiety, i can cover it up with the apparent narcissism, but i think i am pretty gentle and kind and iv think people notice it. Some women are upset i don't show more attraction or act like the animal they imagined. The survival state just kinda turns me off. A bit too retentive right now.

..

Ha, as if i need anger management, i just lay down and go to sleep. That's how i was taught to deal with emotions if they're too much. And it was weird how emotional i got after losing like 10 + pages of writing yesterday at the library right as itv logged me off around 2pm

I how there was screen capture.

I am serious about many things. Especially the criticism against my father who i personally feel attached to. Its hard to understand, his current logic is so off and i was really upset by the mind control of the now he pretended to have.

I wonder what he and my mom really did for a whole week. Really, just fixing the sink. That's depressing.

But I'm being judgmental, or just aware of the short conversation. She didn't really want to talk i assume, her voice was so different. It really suprised me.

I really do feel like i need a bit if help right now focusing. I really do need adhd meds or just a shelter to exit this state. And fellowship, but I'm worried i won't be able to go to the rogue church event. Orv that i would be accepted or wanted.

Its not shame

Its called not having basic needs met and others waking by show no real interest in what i think is the most important thing possible right now.

That's how important this is.

That's how important you are.

It's time for accepting that someone knows their body better than you and can make these decisions especially if they're moderately educated and articulated by multiple mediums.

I'm going to vomit.

No i will not hate myself. I have a beautiful message and dream and experience. I an so grateful please don't forsake me.

I feel your judgment, not Shame

I feel the threat of violence you might do to me

If that's how you raise a conscience

Through brute punishment and pain

Then you are not a good parent or friend

Sure, you think you don't like me, but you haven't really net me, that's sad. I play golf and other sports and there is a lot of things you might like to do with me. But that's not what you're interested in?

You just want to punish me?

With all i have to offer?

With all I've done?

I know it seems so worthless to you. But all my artwork really matters to me.

I don't want you to take me away from it and try to brainwash me again.

I never went so long without my records or security. My records are also my memory and so is security.

I will go to meditate and reach a state of peace to be more comfortable to be around

I'm sorry my grief is too much for you.

I was talking to the man who smashed the bottles.

The first and only time i farted felt super good ;)

Such a troll. But the prison shit really is that ducked up and wise in real life, if you were to see, but they painted the walls and might have rid the rates and pigeons

620am they tried opening the door

They did not respond when i asked if there were other bathrooms

That was actually kinda scary.

I hope ashland gas God surveillance and security.

The bald eagle hears everything.

Should i be embarrassed by my strange revelations. A science of health.

Well it sounded like he went back in the building nearby so maybe it's not that weird and they really do with that really on Sunday to smash bottles.

Well, now considering the best option
 is to take a nap but backpack/
 property/ life security bleh

And cj assumed i knew the city of
 Eugene logo or work for the
 government in some regard

And real threats against my person

Failure to even consider them for the
 past while.

Yet its in my publications. Witness
 protection or relocation.

The government is terrorizing me.
 Which i have made known.

But i guess I'll just have to wait for
 some bureacratic process to take their
 sweet time, determining if my
 grievances are legitimate, which they
 are plainly.

To put me in with gangsters and
 subject me to life fears for not just my
 self but my family.

Forced into a state of detachment
 from all of it...

...

521pm

So, while they play me like a mouse in
 their maze; failing to take notice or
 concern, for what was ultimately their
 doing and responsibility. Conditions of
 confinement. And still, they continue
 to neglect, negligence, and subject
 so many of us to it.

The government is terrifying, so much
 power, everyone is a suspect, so
 inhumane to continuously subject us
 to this

This is not anti government

Its for government accountability,
 government evolution, progress.

But instead they go after the
 reflections of their designing.

And even after i make notice of the
 observer effect

And claim to have the right to know
 my observers real interests, real
 investments and property, waste,
 behavior.

And so, i am just to wait... i can
 endure, i can survive pain.

543pm

Rain for like 4 days

Headache or trying to overcome what
 i believe are projections onto me, as
 I've already written the benefit to
 covering one's figure amidst

Blah new tag i noticed

blah

Trying to actually write what one feels

And the random/ weird differences

Nothing how one thought or wanted
 the structure to go

Trying to grasp the inspiration itself

and now they've created their own
 more complex narratives without ever
 giving me or anyone else for that
 matter(not just me is, has or will be
 persecuted

..

As if writing isn't itself a job which
 many do every day all day.
 (Constantly, constantly having to bat
 away the recurring judgment that i am
 lazy or unproductive, or invaluable, or
 incapable

When the hierarchy of needs

The hierarchy of motivation is properly
 tended to.

Because our basic needs are our
 foundation and we are collectively
 destroying/polluting our earth, air,
 water and fire and limiting and
 inhibiting mankind's fullest
 collaborative potential, which we
 should be striving for, as most i
 believe would agree on the value of
 progress, real progress, not just
 elitist, corporate, private interests who
 have continuously downspoken and
 enclosed mankind and many
 inventions/ solutions which already
 exist.

...

553pm

How to make amends for the immense
 distortion that believes i am so
 critically judging other individuals,
 when i have time and time again said i
 am judging the systems. Or The
 System. As many systems could be

included into a more inclusive,
 equitable, oversrching system that
 really respects minority cultures

But to be gaslighted and out of
 exhaustion Sarcasically play the part
 of their own making..

And if what can stop someone from
 believing a false narrative about you,
 suspicions are always .. and once you
 have reasons to distrust. Such as the
 deep state, which i have provided an
 educated dissertation/ complex...

602pm

614pm

How improper
 authority/shaming/threats create a
 whole body disease. Retracting
 glands, penile, adrenal, heart etc. Not
 by the logic of the shame but by a
 primal/ subliminal/body language
 threat of force. Because people will
 hold onto things that aren't even true
 that someone else impressed onto
 them.

Improper/ uneducated guards,
 should all be trained as they Fuck with
 prisoners back/ enjoy a sadistic game,
 which is common, and justified by
 whatever "criminal"/ dehumanizing
 statement/ belief/ hatred

618pm

Making it a hate crime to target the
 homeless, excessively, beyond reason
 it's something i heard at the 420 park.

620pm

Ha ha ha, so funny /s

Trauma smile.

How a country treats its homeless,
 how sad of a reflection to continue to
 ignore. How fucking sad.

They don't believe in the human spirit,
 or they don't understand the intensity

of the struggle. Or it's such a convoluted governing structure, nothing is happening, and

why is it so hard

Why does it take so long

For us to be given the right to have our basic needs insured, protected now and for future generations to come.

Why is that such a hard concept to accept, that we need these things to survive and should take immediate measures to preserve their health/well-being/longevity.

Such a basic and obvious logical step. Our foundations are built upon such, physically. So our governing structure is obviously anarchistic/evil/chaotic/death-producing if it continues to ignore such basics on the environmental and individual level.

To ignore the science of motivation, how pathetic, to just try to take credit, or assume its just a matter of a weak will or personal moral flaw instead of a contextual/systematic design flaw.

631pm

So, continuously subjecting myself to an environment where people don't believe in me, have scripts and false narratives, is ultimately damaging and able to actually manifest itself.. what can you expect around a crowd of homeless? With own unmet needs and others actively trying to distract.

635pm

Practicing light speak is futile

If those around don't believe in positivity or that way of speaking

Its a joke to them

A reminder of their cruel upbringing

Shaming the privilege to have auxiliary positivity as a nuisance, fake or unrealistic.

636pm

Its all just for their entertainment, "an adulterous generation will reject him".

I am not Jesus, I wish I could heal people, doesn't everyone? Ultimately

its in your beat interwoven to heal those around you.

And many other unnamed saints and prophets of all cultures.

Still martyrdom. To this day, for their belief in Christ, love, world peace.

..

"When the medicine is good you stay for awhile"

But I can't make good medicine right now, I need shelter and shared values with a group of others...

641pm

The busy hive effect

Such a disease especially when its buzzing in the wrong direction..

Gold standard, no honey standard, can't live off of gold in a state of survival...

...

644pm

I need to pee again but my shoes are wet and I don't want to have

ugh poor me first world problems

Still, its real, depression is real and pervasive, so is rain and lack of cover.

....

654pm library already closed

656

I already stated suspicions of flash mob, crisis actors, which is horrible already to be added to the bystander effect. Still I'll try to respond authentically if I can, but the deep state knowledge and experience is in the background, so until I or anyone can learn to trust our government, which should be earned, not expected during one conversation.

Major overhaul to DHS, and assistance so one can easily be matched with like minded others on similar missions.

A productive and less persecutory, more collaborative and functional/creative/ growing sort of surveillance.

But without shelter, still be easy to miss deadlines/time requirements/rushes/ deadlines due to... exhaustion/ disagreement/colorlessness

Can't hop on the fast paced city vibe quick enough.

703pm

Waiting for phone to die 1%

Wish I had a journal, or knew where mine was...

Someone screaming loudly, but I'm sure just like other bystanders ignore, disbelieved or just don't care.

Disbelieved.

The doctors paranoia: faking illness for much needed attention and care.

...

I guess that's where the smile came from on my dad and others faces

From disbelief in the injury/worry/severity

To believing it will be fine regardless...

728pm

The backlit error/dent has become unbearable as night approaches.

Hard to type with such a light in your eyes.

...

"So what's the point?"

To wake up to so much we could be doing if we can follow our own blueprints for (assisting our brethren/bretheren*) motivation science, sociology, I don't let the studenta direct the conversation, most lose that level of intellectual thought when not actively being used.

As many may experience revisiting math, writing, history, etc or other skills not put to use more regularly in their profession.

Study: post formal thinking not maintained by many students, an experiment has shown with regards to piaget and students not questioning the reliability of the calculator, when given faulty calculators..

That wouls also be a "trust",
conformity, obedience sort of issue
related maybe more to a blind truat in
calculators or authority or etc.

832pm cops just sitting so gotta make
a recors

Also 2 nights ago, as cops stared us
down, shortly before a new dude

Timay said he bought out daniel in
fetty and instead of agreeing that
potency tests or warnings were
important : as there is always different
product concentrations.

In usual spot typically left for people
to sleep but there is someone in
building so maybe they are concerned
about something like exit.

But he said, which i agree with: "any
fentanyl uae is dangerous, and as a
reapiratory depressant to decrease
pain it will kill you."

Which i said most doxtors could try
better warning their patients about
but instead happily profitting feom
disease.

Pain medication should be available

And not forced to be sough out of
suffering

And risking death from a new and
potent

Sometimes just one or two hits is
enough..

128pm

Funny that same night as timay
crouched in corner after his fetty dose,
tabour was blowing glass with a torch
(looks like smoking). He said "im
playing games". And they probably
thought he had massive balls for
doing that in front of the cops (a slight
trick i guess but he was invested in
blowing glass before their arrival)

buy our check up. Sure surveillance
caught some funny pictures of us all.
I'm just sippin a fucking mickeys from
a fat glass bottle..

Still makes me laugh. How suspish we
all looked or were just aware of the
amount of surveillance and on the
look out

Funny group pic, sure.

8pm

Just now accepting my depression= sleepy, hungry, lack of motivation

Really think a real place to rest would be healing, like the forest

Think much of it is just sleep dep. From lack of security/ shelter

821pm

Long wild night hanging with kim and her constant chatter, she made a few sleepers upset, i was amused and she bought beers n food. Michael called her mama bear and said the community took good care of her with moneys and that she could be at a hotel if she wanted but enjoys a few of the street peeps n life. She tossed a 20 into a vent by accident after complaining she thought a youngster took her 50.

I slept at skimmers n got poison oak rash before day break. Horrible huge colony of ants i slept close to, got me moving out earlier than expected or desired.

Hypnotic, mesmerized zombie sleepiness could just lay under the trees for days.

..

"Bunny hop that shit for days" handshake the wordslinger as the group passes by.

828pm

Large group of 50 or so crows spotted recently flocking around town spots

Think i need a recharge and then to just stop frequenting the park dead zone of brain activity probably picking up a lot of disease especially since it has become a daily thing for some loud fight or conflict to take place there

855pm

So basically

With my model

To explain

The reason for such "lazy" homeless behavior

(Depression, learned helplessness, sleep deprivation, "orbitals" (influencing people, institutions, culture),

And to use it to escape my current situation, but i realize i am still grieving the events i came from before here. So, trying to have compassion and patience with self and others but honestly interested in speeding up recovery/ health, wellbeing (or maybe this "speeding up" is an influence of anxiety rush coffee culture vehicle and other enviro noises)

901pm

I heard someone saying they didn't live themselves

And i think basic self care, food, sleep, and those efforts alone show you love yourself, and loving yourself is also a group effort in the human tribe family animal. That's what civilization is supposed to be, a big tribe, AGREED UPON COLLECTIVE EFFORTS AND COSTS (INFO. CONSENT)

and we have let ourselves be over run by forced association without our choices or intentions on the matter.

Every culture he said

Are by nature, greedy

Nope, not true

Greed is conditional

And there are evidence of cultures
who lived peacefully and not
destroying their environment but
taking care of it and nurturing the
local life to increase its security
through biodiversity.

But many cultures get credit for
violence, greed, destruction

A prior conversation comes to mind

On the importance of developing pain
metrics

Although each patients threshold is
different/ subjective

An objective meter can be developed
to measure each experience based on
their average, low and peak
thresholds

Also, excessive is needed in daily life,
because the body is so encumbered
by gravity and decay it must be used
to maintain a decent average pain
threshold which most benefits the
breath

As breath and pain have an
interacting relationship

Some depressants work by cutting off
nerve endings activity for a time
which also lowers the breath

one foot in the grave". The way they
grafted it too, only keeping his heel
made the herl look like the tip of a
"salmon head" or more obviously, a

Funny dude. We spent time near the
river and chatting in the plaza.
Apparently in April he was hit over the
head with a propane tank heater
repeatedly and caught on fire in the
tent with another person... James
brown said he was there pulling them
out.. screaming for 15 minutes in front

But not to get distracted from the point, which should focus on man's capacity for good, encouraging it, taking down the false narrative and powers of identity theft which have so wrongly condemned the human. Ultimately, the state is responsible for encouraging and conditioning violence instead of a peace education and real physical model.

Where does the highest road of morality lead? How can people misinterpret Jesus most basic message to think he would ever condone, let alone encourage violence or violent behavior?

As the churches work to live by Christ message they need to promote self sufficiency and community as a means to world peace. And telling people to think for themselves is one thing, but providing a stable foundation of education and living that actually encourages that is another thing. I would not trust the average person to not fall susceptible to bias and kawaii/lavish elaxidazical* education without first giving them a warning label of common human errors/shortfalls, to keep on guard for. The library and the museum are the ultimate tools for maintaining our records, which are proof that despite our short and sometimes futile seeming life, the community lives on and our story/impact is important. To get out of the individual flight or fight for the eternal evergrowing communal spirit. Which will be preserved in genetics and vibrational traces across the universe(s) despite any attempt or fear of losing all in our earth. Which we should work to preserve. But even in the case of its destruction, maintain hope that an on going record is available in our very dna, and in future, the tools to access this universal record will improve. But still paper and pen, and physical copies. Scrolls of ancient temples and cuneiform tablets, preserved, sacred to our minds/monks* whose job is to hold this knowledge as sacred and protected as possible.

It's great, the term "think for yourself", because many would say not everyone can think for yourself, but that goes against the inner voice, spirit, conscience, heart felt logic reason empathy compassion which is

already there. Just waiting to be re opened. Closed and narrowed as a child accepting and confirming to the classic worldview which says it can't happen or to just wait for paradise, instead of energizing us to fulfill our ancestral promise many were baptized in and for with faith.

To stir and wake the dead, for their counsel, for their energy, for their support in their own upliftment. Can they rest so easy?

The holy spirit is not here to mess with the grateful dead but to wake them up to their own name, label, and promise. But the energy required to motivate people, is not easily shared, as the fear of loss of control or distrust easily shuts off the transference of energy and even worse, creates a emotional drama, venting, healing stage where still the parties fail to commit in collective unity/ trust. To know if you can commit and collaborate so easily, is actually a privilege, to have overcome your doubts and continually offer collaboration, services.

But as I age, and become tired of my own artwork, another privilege, to be able to be an artist. Truly we are all artists, but to engage in that pursuit all in your own is a beautiful gift. Shall we celebrate the arts? Or fish their destruction? Oh they could never die down, but the opportunity should be more readily available.

Celebrating artists, and going on a limb, to create FEELING.

A return to feelings, after our long absence, or more accurately put, self disciplined hereditary post traumatic slavery disorder. Now we are allowed to feel? Its okay to be emotional.

Emotions can manipulate. Truth in healing resolves doubt, from the basics on up, security is a basic need.

Do not put beliefs above basic needs. It is not helpful or sane. Some claim to out mental physical reality, but I am against those hypnotic gurus, self deprecated dogs. Would you make your dog sit all day or learn to play with it during its short time here. That is what I have to say to transcendental monks who have had enough of this physical reality. But I'm really in love with the potential (and the dualistic preference or criticism is unnecessary, their meditations are having a greater impact than an army of playing dogs/or cats or whatever you want idk anymore. Venting, ohhh, I thought I was doing a scholarly thesis...

Hmmm...

Do you know what the Devil thinks when he sees men use violence to propagate the gospel? He sits with folded arms behind the fire of hell, and says with malignant looks and frightful grin: "Ah, how wise these madmen are to play my game! Let them go on; I shall reap the benefit. I delight in it." But when he sees the Word running and contending alone on the battle-field, then he shudders and shakes for fear."

But focus and attention is lost when you think someone lies, (there's a lie in every statement, a truth in every statement. Depends on interpretation/ past programming) everyone lies, survival lies, ego lies..So basically, both parties lose trust in each other and ever so slightly, unconsciously muse fantasy while attention dwindles, and a return to the hypnagogic state of child like bafflement, inebriated, lack of differentiation between stable reality and inner fantasy.

Or math can show that what people think is rational thinking is not, its not objective either, perception is uniquely catered to one's conditioning (sorry, but Jesus told me his love was actually conditional, you had to believe in him to live for ever. And also i think it had something to do with his ability to heal, their belief or trust...[if only seeing was believing, {free rebirth blinded by light NDEs for sale}]), all "rational"/"intellectual" thinking is intuitive defense mechanism. 6724_240608_145608

the core issue is: Are you essentially criminalizing a state of being?

Are they being punished because they are sleeping or the action? Or are they being punished because they are homeless? And should cities be free to make these decisions for themselves?

Municipalities have competing priorities. I mean, what if there are lead pipes in the water? Do you build the homeless shelter, or do you take care of the lead pipes? What if there aren't enough fire protection? Which one do you prioritize?

You have to provide them an alternative. If you're going to say, "You can't be here, and then they go, 'Where should we go?'" you have to have an answer to that question.

I think it's important to also note that, for instance, you could be starving to death, and it's still illegal to steal, right? It's illegal to steal bread or something like that. I mean, we've all seen Les Mis. So that's not allowed. But at the same time, the distinction that's being made here is: "You don't criminalize starvation; you criminalize the stealing of bread, versus, 'Are you just criminalizing homelessness in this case, or are you criminalizing sleeping in this place at a specific time. Are you providing reasonable restrictions?"

How do you provide for order while allowing people to be free and do what they want to do? And, in some ways, it's not a real tension. Like with the homelessness, "I think that's why I'm so interested in it. And I'm just like, 'There's actually a solution to the crisis. You could just provide housing that is sufficient for the people who need it, and then you would not have homelessness.'"

ChatGPT

Write me a 1000 word essay answering the question "why don't people always do what they know is good for them?". Include citations in from a variety of disciplines such as philosophy, neuroscience, biology, psychology and sociology, cognitive dissonance, conformity, the state of knowing vs applying and doing.

Why Don't People Always Do What They Know is Good for Them?

Human behavior is often a puzzle, especially when it comes to individuals knowingly engaging in actions that are detrimental to their well-being. This phenomenon has intrigued scholars across various disciplines, including philosophy, neuroscience, biology, psychology, and sociology. By integrating insights from these fields, we can begin to unravel the complex interplay of factors influencing human decision-making and behavior.

Cognitive Dissonance:

One key concept that sheds light on this issue is cognitive dissonance, as proposed by Leon Festinger in 1957. Cognitive dissonance theory suggests that individuals experience discomfort when their beliefs or behaviors are inconsistent with each other. When faced with this discomfort, people are motivated to reduce it by either changing their beliefs or rationalizing their behavior. For example, a person who knows the health risks of smoking may rationalize their behavior by believing that the negative effects won't happen to them or by convincing themselves that they will quit soon.

Conformity:

Social psychology also offers insights into why people don't always do what they know is good for them. Conformity, as studied by Solomon Asch and others, highlights the powerful influence of social norms on behavior. People often conform to group expectations, even when they know it's not in their best interest.

This desire to fit in and avoid social rejection can override individual knowledge or rational decision-making. For instance, someone may continue to engage in unhealthy eating habits because it aligns with the norms of their social group.

Neuroscience:

From a neuroscientific perspective, the brain's reward system plays a crucial role in motivating behavior. Dopamine, a neurotransmitter associated with pleasure and reward, reinforces certain actions, making them more likely to be repeated. When individuals engage in behaviors that provide immediate gratification, such as overeating or substance abuse, the brain's reward system is activated, often overpowering the rational knowledge of long-term consequences.

The Knowing-Doing Gap:

Psychologists have long observed the gap between knowing what is good for us and actually doing it, a phenomenon known as the knowing-doing gap. This gap can be attributed to various factors, including lack of self-control, procrastination, and competing priorities. For instance, someone may know the importance of exercising regularly but struggle to prioritize it over other commitments like work or family responsibilities.

Evolutionary Biology:

From an evolutionary perspective, human behavior can be understood as the product of adaptation to ancestral environments. Evolutionary biologists argue that certain behaviors that may seem irrational today, such as hoarding food or taking risks, were adaptive in the past when resources were scarce or survival was uncertain. These evolutionary remnants can influence modern behavior, leading people to prioritize short-term gains over long-term well-being.

Sociocultural Influences:

Sociocultural factors also shape individual behavior and decision-making. Cultural norms, economic disparities, and institutional structures can create barriers to adopting healthy behaviors. For example, individuals living in impoverished neighborhoods may have limited access to nutritious food options or healthcare services, making it difficult for them to prioritize their health.

Conclusion:

In conclusion, the question of why people don't always do what they know is good for them is multifaceted and complex. Insights from philosophy, neuroscience, biology, psychology, and sociology highlight the interplay of cognitive, social, biological, and environmental factors influencing human behavior. By understanding these factors, we can develop more effective strategies for promoting positive behavior change and improving overall well-being.

Attaining True Knowledge through Contemplation of the Forms

Plato, the ancient Greek philosopher, proposed a theory of forms as a means to understand the nature of reality and attain true knowledge. According to Plato, the physical world is merely a shadow or imperfect reflection of a higher realm of forms—abstract, eternal, and unchanging concepts that represent the essence of things. Attaining true knowledge involves transcending the material world and contemplating these forms. In this essay, we will explore the concept of the forms and outline concrete steps that individuals can take to engage in such contemplation.

Understanding the Forms:

Plato's theory of forms posits that behind every physical object or concept lies a perfect form or idea. For

example, there is a form of beauty, justice, goodness, and so forth. These forms exist independently of the physical world and are eternal and unchanging. The physical manifestations we perceive are mere imperfect reflections of these perfect forms. Plato uses the allegory of the cave to illustrate this concept, where humans are likened to prisoners confined in a cave, perceiving only the shadows cast by objects outside. True enlightenment comes from turning away from the shadows and gazing upon the forms themselves.

Steps to Contemplate the Forms:

• **Philosophical Inquiry:** The journey towards understanding the forms begins with philosophical inquiry. Individuals must engage in critical thinking, questioning the nature of reality and the underlying principles that govern it. This involves examining assumptions, challenging beliefs, and seeking deeper truths beyond the surface level of existence.

• **Studying Plato's Dialogues:** Plato's dialogues, particularly works such as "The Republic" and "Phaedo," provide insights into his theory of forms. By studying these dialogues, individuals can gain a deeper understanding of Plato's philosophical ideas and the methods he proposes for contemplating the forms.

• **Seeking Universal Truths:** Contemplation of the forms requires seeking universal truths that transcend the particulars of individual experiences. Individuals should strive to discern the underlying patterns and principles that govern reality, looking beyond the variability and imperfections of the physical world to uncover the eternal and immutable truths represented by the forms.

• **Reflective Meditation:** Reflective meditation can aid in contemplation of the forms by quieting the mind and focusing attention inward. Through meditation, individuals can explore the depths of their consciousness, transcending the distractions of the material world and attuning themselves to the realm of pure ideas and forms.

• **Engaging with Beauty and Virtue:** Plato associates certain forms, such as beauty and virtue, with higher truths and ideals. By engaging with beauty in art, nature, and human relationships, individuals can glimpse the form of beauty itself. Likewise, embodying virtuous principles such as justice, courage, and wisdom allows individuals to align themselves with the form of the Good.

• **Dialogue and Discourse:** Plato emphasizes the importance of dialogue and discourse in the pursuit of knowledge. Engaging in meaningful conversations with others allows individuals to exchange ideas, challenge assumptions, and refine their understanding of the forms. Through dialectical inquiry, individuals can uncover deeper truths and attain greater clarity in their contemplation of the forms.

Conclusion:

In conclusion, Plato's theory of forms offers a framework for attaining true knowledge by contemplating abstract, eternal concepts that represent the essence of reality. By engaging in philosophical inquiry, studying Plato's dialogues, seeking universal truths, practicing reflective meditation, engaging with beauty and virtue, and participating in dialogue and discourse, individuals can embark on the journey towards enlightenment and true understanding. Through contemplation of the forms, one transcends the limitations of the material world and accesses the realm of pure, unchanging truths.

The Interconnection of Authenticity, Humanism, Pseudo-Community, and Modern Slavery in Global Supply Chains

In our interconnected world, the pursuit of authenticity and humanism should ideally guide our actions and interactions, fostering genuine connections and empathy for others. However, the reality often reveals a

stark contrast, where pseudo-communities and modern slavery persist within the intricate web of our economy's supply chains. Understanding the link between these concepts sheds light on how seemingly disparate phenomena are intricately entwined, implicating all participants in global disparity and human trafficking.

Encouraging Authenticity and Humanism:

Authenticity entails aligning one's actions, values, and beliefs, fostering genuine connections with oneself and others. In a humanistic framework, individuals recognize the inherent dignity and worth of every human being, striving to promote well-being and justice for all. Encouraging authenticity and humanism involves cultivating empathy, compassion, and a sense of solidarity with others, transcending barriers of nationality, race, or socioeconomic status.

Pseudo-Community and its Deceptive Nature:

M. Scott Peck defines pseudo-community as a stage in group dynamics characterized by a superficial sense of harmony and belonging. In pseudo-community, individuals may suppress their true thoughts and emotions to maintain the illusion of unity, leading to an artificial sense of connection that masks underlying tensions or conflicts. Pseudo-community inhibits authentic communication and hinders genuine relationships, perpetuating a cycle of misunderstanding and disconnection.

Modern Slavery in Supply Chains:

The global economy relies on complex supply chains that span continents, encompassing diverse industries such as agriculture, manufacturing, and retail. Within these supply chains, modern slavery persists in various forms, including forced labor, debt bondage, and human trafficking. Vulnerable populations, including migrants, refugees, and marginalized communities, are often exploited by

unscrupulous employers who prioritize profit over human rights. Despite international efforts to combat modern slavery, it remains pervasive, fueled by demand for cheap labor and goods.

Implication of Participants in Global Disparity and Human Trafficking:

Every participant in the economy's supply chain, from producers to consumers, is implicated in the perpetuation of global disparity and human trafficking. As consumers, our choices shape demand for goods and services, influencing production practices and labor conditions. When we prioritize affordability and convenience over ethical considerations, we inadvertently contribute to the exploitation of vulnerable workers in distant corners of the globe. Similarly, businesses must prioritize ethical sourcing and supply chain transparency to ensure that their operations do not perpetuate human rights abuses.

The Call to Action:

Addressing the interconnected issues of authenticity, humanism, pseudo-community, and modern slavery requires a concerted effort at individual, institutional, and societal levels. Encouraging authenticity and humanism involves fostering empathy, promoting social justice, and advocating for the rights of marginalized communities. Combatting pseudo-community requires creating spaces for genuine dialogue and collaboration, where diverse perspectives are valued and respected.

To eradicate modern slavery in supply chains, stakeholders must prioritize transparency, accountability, and ethical sourcing practices. This entails conducting thorough audits, enforcing labor standards, and empowering workers to assert their rights. Consumers can support ethical brands and demand greater transparency from companies regarding their supply chain practices. Governments play a crucial role in enacting and enforcing legislation to prevent human trafficking and protect the rights of workers.

Conclusion:

In conclusion, the connection between encouraging authenticity, humanism, pseudo-community, and modern slavery in our economy's supply chain highlights the complex interplay between individual behavior, group dynamics, and systemic injustice. By recognizing our interconnectedness and taking proactive steps to promote authenticity, humanism, and ethical conduct, we can work towards building a more just and equitable world where the dignity and rights of all individuals are respected and upheld

Re engaging with the confidence yesterday which is variable to each social group change...

604pm yelling at neal for being manic

Telling him to be more careful with his words

Really angry energy

Words power to me is a joke until we actually can transfer the spirit of collaboration and unity

And manic does mean to relax in peace and poop. Often many things can lead a child to manic energy and yelling is one way to shame and scare into submission or just hidden painful constipation.

They don't know why they're manic or why it hurts some people so much. It doesn't bother many. And their own distrust of the words is more a problem than the word player

I am unitarian universalist

I can find the light and truth in any word scheme if i so try

But our fear and failure to remember the unease heightened energy brings to "deadbeat" or anger management tense people. I hate that wors dead beat, put on me i thought maybe. But learned helplessness is real way to understand the dead beat and or just inability it lack of willingness to collaborate, which i have always expressed interest for

But yes we're being parrots like he so critized others he is himself

Until we collaborate.

But IDK in actually pretty sad after that. I sometimes support his blunt loud command/direction/advice which i saw him use the day we hungout like on the peepee player (peeing in a bottle or grabbing himself right in front before coop) and "water girl"

"I came to ashland to save the children" she said as she poored water at the coop while we sat

Lack of love received

Lack of love given

So selfish a poem

Or a certain kind of law

On love

Some pretend it changes other for good

My writings aren't even an expression of myself in normal life person to person conversation.

From thought to write and thought to speech is different translation even though it would seem the same.

Just making excuses for self conscious revision after creating persecution for a certain art style

And to blame some for not breaking fast enough is a great horrible shaming

My portfolio accomplished more than i care to write about on here but i have some good additions.

Be careful

Write a short novel tying together humanism, jungian vs freudianism, shadow therapy, ancient Greek philosophy, goodness and truth also, peace activism by David Adam's, the experiments on; addiction and community, intrinsic motivation,

conditioning (both classical and operant and any new systems), memory inaccuracy, bits of information to process different tasks, conformity, obedience, bystander effect, Lucifer effect, observation effect, Golem and stereotype threat, the evil eye, the temporal brain circuit brain partition, the 8 circuit by leary, ancient Egyptian to Christianity and unitarian universalist underlying love principle and truth being the highest religion (with a criticism on chaos magic, involuntary or unconsensual hypnotism (also tie this in with our write to voluntary explicit and voluntary consent as laid out in independence and developed through the hospital industry, and criticising war crimes of each president and poor horrible conditions of prison), the help of near death experience in life such as ancient baptism and also in psychedelic plant medicine, past and modern slavery all in relation to the identity, developing authenticity

Titled the sunshine claim

Also include a chapter on Civil rights, the declaration of independence section on consent, article four of the universal declaration on human rights, modern slavery and ptssd post traumatic slavery syndrome, property rights, environmental rights, public health rights

, alternative options right, drug education and end to prohibition and restrictive authoritarian parenting government prone to poor regulation and lack of accountability,

Then write a class action lawsuit suing the intelligent surveillance groups of America and the world, for improper use of intelligence, negligence, failure to take notice, deliberate manslaughter and toxic people and environment such as air and land and water qualities, unprecedented carbon dioxide and the

effect of carbon dioxide on the body, and how breathing can also change acodic bodies and the acidic ocean proof of pollution you can self test the carbon dioxide theories and self testing, peer review and democracy are all about participation and education and willingness to learn, collaborate, grow.

Then end with the original martin Luther king speaking on nonviolence, the devil, and the Seville statement on violence key points to make a lawsuit suing the state and every business, institution, for mis-education, negligence, and participation in global genocide and economic disparity as well a vulnerabilities to grid failures, natural and man made disasters.

Then end with a speech on seasonal affective disorder, clean water, vitamin d and other essential vitamins, emotional tolerance and intelligence the history of mis-appropriation and the courts history of identity abuse through false narratives, its lack of science on whole systems prevents it from curing the disease as it falls to address the root concerns of addiction and crime by becoming more secure, self sufficient and authentic not pseudocommunities. Because it is important as a public health concern to address systemic issues/inadequacies/infections/corruptons not individual felonious/"evil" or shameful (needless disease inflicting) deeds,

Ancient Land and property thefts and the courts misusing technology, maintaining a needless delay and over use of ineffective white washed language and pseudomorality, but the effect of maintaining fancy letters and the poqer of word transitions to practical magic, manifestation and dark and light magix defined as eother causing disease and destruction or empathy and healing also holistic psychology, subliminal programming, unconscious hypnotism and unconscious vs conscious mating/dating rituals. End with a combination on tantra, shakti, chi, prana, fundamental forces, and verified consistant scientific laws

Leads to a chapter concerning the power of breath and ventillation, the hiatory of the word inspiration and respiration, the variables involved in building and controlling the aize and heat of a fire and how thats knowledge on piaget meta systems to see its whole footprint from a distance and then lead to a new story where

you change the ending of platos allegory of the cave to include the prisoner not escaping but learning the variables of fire conyrol by opening the dopr to increase ventilation, and by doing so the prisoner exposes the most clear image to stabilize the shadow precisely to its sharpeat and most accurate detail. And compare the bright flame to the sun and the power of illumination in shadow therapy. And then end with a verse on the spell of forgiveness and throwing the stone, in the popular lords prayer and the alchemical implications of trying to square a circle. and the implications of infinity in the symbol pi and in infinite limits in calculus and the infinite splicing of a number.

And try to tie in the sunshine claim as being a right to property, consent and receiving literal sunshine, vitamin d and others essential, a positive and/or a sunny(allegorical/symbolic) narrative and identity for humanity using humanism to account for past collective grievances (give examples of most popular and underrated social movements and concerns and also quote the declaration of independence about our duty to ammend a wrongful and harmful government) and to meet basic needs and security, the original sun god, the word sol in spanish, the edology of the soul (which will be composed of explorations on the kicro and meta systems of the human in holistic psychology, the cycle of elements, cyclea in math and phyaiics, cycles in moon and menatration and breath and tides and in grief and terror management theory, cognitive dissonance, unconscious and repetetive unhealthy behavior, the orders of magnitude comprising our universe (in size and weight and heat and waste productions) attachment styles and attachment theory and trust, betrayal trauma theory, thr 4 humours the 4 elements:air, water, earth, Fire, four directions and importance of triangulation mathematics and mapping external and internal realities, and the holistic use of psycho-bio-socio- spiritual intersections and categorization. Also include in this section which is titled the ecology of the soul we will include the importance of meetings ones basic needs in motivationas opposed to trying the power of belief over simple day to day self health care, and the limitations of biasd belief systems versus consistant peer reviewed of stable laws and objective truths exposed by thr beauty of science to discovery and record and measure and create from the immensely,

incomprehensibale large universe which is not only beautiful but waiting to be explored and nurtured or privately respected and left alone (proper use of prior consent laws, rights and development) and add

and criticize the courts for lacking the use of effective whole system management, failure to take notice, unnecessary with todays tecnology time delays, unnecessary over complicated language, excessiveness and inefficiency as opposed to the natural efficiency of the earth, priceless elements being unnecessarily harmed and hurting our health

Recommend public health reform, consensual living, awareness on issues and immediate and beneficial micro economic development and investment solutions for self sufficient community business ventures which can be eco-minded(with goal of attempting negative or atleast close to zero harmful imprint on the earth as that is the most moral law and which is scientifically verifiable through stoichiometric science.

And then describe black and white as shades not colors, the spectrum of color, right and wrong, duality, yin and yang, and how all that can br eliminated with collective and collaborative unity and consensual agreements to work together for the greatest good.

And remind people of the sollutions pointed to in the declaration on a culture of peace and program of action which concerned the right for each citizen to develepe to their fullest potential.

The last word in the novel shall be "amen."

And the whole novel should focus on creating a conclusion celebrating religious tolerance and unitarian universalism, finding religious books with verses agreeing with scientific laws and building a foundation of love which is the main human rights to clean and pure water, air, land and food, shelter and security. Which are their basic needs on the humanistic ladder of maslow motivation. And the transcendant function developed with the idea of guardian angels creating systematic changes to resolve collective grievances and how their perception changes upon reflections

on death and selflessness as opposed to selfishness which is conditioned.

Explore exciting options for conscious conditioning and a court system which uses transparent modern app communications and input from everyone in the community. Protect the identity of the criminal for attempts to objectivity, move to a humanistic model and be rid of the unnecessary Brutish chains, outfits, conditions and compare slavery revolts and exits throughout time such as rxodus, the seville wars, the civil war and now our current to end modern slavery and poor economic and community development/design safety/security and morql obligation to ammend our impact on globalist produxts from multinational corporations who maintain global disprity and unsafe and unhealthy working conditions.

Actually writing itself, this OpenSolaris conversation. I see the negative side of inviting/ incoming other observers to try to predict off poor biasd assumptions what i could mean or where im going but no one has really maintained a relationship with me through my whole life to really know. My family might presume but how much i have changed and criticized, really they dont know me but likely better than any reader or party making rash assumptions off my publications alone...

852pm

I got weirdly hangry so i bought food.

250pm

Wow long conversation with joe tari

Key concept for his film revolving around him shooting lasers out of his ass as the government tries to discover its secrets and chases him around as he discovers his true identity and the identity of the world has been manipulated by anti- human aliens of bad intentions

Anyways... pray for my re-inspiration back to the important echoing templates i began so long ago.

I felt really upset at people or whoever was trying to get my attention and not helping with my novel which i was so excited to work on today but can't find any privacy to just use my own brain instead of having to feel watched and disbelieved or even disgusted at because of their failure to even try to understand my dreams and passions and work. I'm really upset at the intelligence community and any random noob transparent observer / stalkers ...

Oh and they don't exist, I'm sure. No one has read or cared about my writings, sure.

....

How do we ask Gaia for consent? Big social issues

330pm

808pm

If i was truly judged by a jury of MY peers i would not have been found guilty. Because most citizens have private interests. But my associates are public activists and holistic health educated and/or conscientious objectors to the prevailing "authority"(whitewashed pseudo-puritan laws are not effective, objective or natural and scientific. They are the result of a population sleeping (by way of gocernmental design)to its responsibility to create its own citizens community grassroots justice

What torture, to spread awareness and get no coherent reply or acceptance, excitement and collaboration for the better..

...

An annoying bird almost made me leave, nope its back, i thoght my writing about it made it quiter which it has stopped again thankfully just a loud annoying chirp either in distress or somethin assume. Yep now it has left.

Believe in yourself and believe in each other.

I do but no one wants to actually collaborate besides

And my inspiration to write more at library, seems to have died a bit, taken "off course" by another project consideration with joe tari. From film school 1 year to social services major. Could see him playing a good version of joe bear concept character just on anothe slightly different timeline.

I live a public life. All homeleas are more public servants than those with a right to privacy. But a right to privacy is essential to freedom just like rights to basic needs,security, shelter, alternative options, adequate healthcare.

I'm not upset at joe tari I'm excited I'm actually blaming the people i believe watching me in the library. Because i was filled with... inability as if their own needs over took mine, which is great for attending or nursing/ nurturing but...

To just commit to the writing of the novel, until we meet again i shall try to force out those new ideas and return to "the sunshine claim"

I saw the police harvesting more homeless today. Because its so essential to handout tickets for smoking in public when cars create an objectively measured more negative footprint.

GREEN is good for sharing visions. Like mother earths green forest n vegetables n fruit, healthy poop and Marijuana.

But it is not good to smoke Marijuana around cops because they likely don't share the same vision (WORLD PEACE) and will take advantage of being constipated and projecting their lack of peace onto you. And playing their predator games, which they're mostly unconscious of or justify.

Id like to smoke again but I'm sometimes surrounded by faithless, and that's not a vision i care to share. But remember having faith, does not mean sloth, but also have compassion for the unmet needs of our universal tribal heritage to be a part of community. As our minds work together, not individually, great teams flow without much need to coordinate, adapting, adjusting, conscious responding. We we're born as three in 1. With a mother, father and child.

Basic sociology and psychology and religious tolerance, humanism is to be used, to resist the Lucifer effect and other.

I think I'm surrounded by mostly undercover, that's fine, people like privacy and anonymity, i prefer

authenticity, and can't reflect it if you don't have it.

It's horrible they convinced people to stop drinking water. "The doctor said i have no lymph nodes" David said. Little does David know, his body is made up mostly of water, just like all his soda, and foods. Literally the best advice my dad ever gave me. Drink lots of water. Thank you dad, love you. Still waiting to be my best self so i can communicate better without sounding "mean" (hungry/hangry/alone)

I'm talking to my fake family and friends.

You guys don't respect culture or the hippocratic oath.

I'm a medicine man, get used to it.

Duck you Rebecca, you cunt. Did you even read any of my stuff? Jk, hope my baby doin good.

I did all this work for you assholes and you think I'm just pretending to be homeless and hungry. You guys are seriously fucking evil.

Damn, white people are seriously fucked up. But everyone else already knew that.

I was just here to parrot you dumb mother fuckers

Whoa, poetic science.

What else happened 7k years ago, Missoula floods are pretty close by.

But people don't trust carbon dating. Time to figure this out. Because maybe carbons half life "magically" changes every so hundred years or so,

just a theory, maybe all the elements are less stable than we think and evolve on their own? Just a theory.

I like to think a wizard destroyed the layer of a deadly, vengeful and murderous dragon. Or a ufo carved it outs with lasers. Alternate/ parallel realities/ universes.

Or maybe frodo really existed and this was the result after he dropped the ring in.

I discovered shira is actually golem and I'm dolem his friend he killed for the ring. Because she did throw a rock at my head to put mount Ashland when we were tripping on lsd cause i wasn't paying enough attention to her. And after she stole it i had to pretend i would give it to her for a baby just because i couldn't let her know i was actually upset she stole it. But she's probably the reason i found it to begin with, ashland cult of weirdos followed me on pct and planted the ring on those 2 backpacks i photod.

Did we ever discover who that dude really was in the ID? the state ID i published when i found the ring.

But ignorant people are afraid to get addicted, not everyone can be a doctor, and the law of association is even more powerful. Id rather be cognitive than addicted to BS pseudo morality claims by the current establishment which denies everyone's inherent dignity, equality and freedom. [] Add "He heals by beelzebub" (MATT 12:24: But when the Pharisees heard it, they said, “It is only by Beelzebul, the prince of demons, that this man casts out demons.”) Rather than follow the evidence to a logical conclusion, Jesus' bitter critics choose a more drastic, stubborn opinion. The Pharisees declare to those nearby that Jesus' ability to order demons away came from Beelzebul, the prince of demons himself. A Beelzebul, which means "master of the house," was another name for Satan or the devil. In short, the Pharisees were accusing Jesus of sorcery, the practice of accessing the power of evil spirits for specific purposes. A

		The state of Oregon is in bed with big pharma, big data, big oil military-prison industrial complex.

Instead of using peer review the state intimidates and hypnotizes an uneducated jury subjecting them to emotional abuse, manipulation, bias and memory issues.

If they really cared about keeping people alive they'd push for my wrongful death complaint.

But big pharma makes a lot of money off covid and all other diseases.

How they profit off disease and grief instead of healing the root cause, they make customers and addicts.

How does locking someone in a cage resolve this issue? It doesn't.

They just send people into prison to join gangs, or get beaten and raped because as the DA who prosecuted me said "that's what we deserve" (not Healthcare). View the PREA annual reports(2) but the true numbers are vastly under reported due to a conflict of interests (independent lawyers should be on call to investigate instead of dep. Employees), retaliation and poorly trained staff.

White lab coat doctors and scientists should work as prosecutors for the state of oregon instead of ignorant DAs like the one who intimidated my witness about being paid to provide scientific evidence

Yet the DA wore a gold pocket watch

A disgusting hypocrite named jampolsky.

An author named jampolsky wrote that there were only 2 emotions: love and fear. But I find that dualistic notion extremely uneducated for:

Love is Fear to Lose what you love.
 Fear is love to keep what you have.

All emotions could be interpreted as various tints of fear, or all emotions could be interpreted as different aspects of love. And one should know that their own interpretation is a projection of there own bias, attachment style and history or trauma with love.

Modern slavery is not okay and our supply chain problem makes us more vulnerable to another covid. Cities are responsible for securing the safety of their citizens who die annually crossing the street. If they really cared, they could provide alternative modes of transport. It is said that in return for some kindness rendered by Asclepius, a snake licked Asclepius's ears clean and taught him secret knowledge (to the Greeks snakes were sacred beings of wisdom, healing, and resurrection). Asclepius bore a rod wreathed with a snake, which became associated with healing.

he a bronze image of a serpent on a pole. The image is described in the Book of Numbers, where Yahweh instructed Moses to erect it so that the Israelites who saw it would be cured and be protected from dying from the bites of the "fiery serpents", which Yahweh had sent to punish them for speaking against Him and Moses

In the future the chorus won't be this dualistic, win-lose, hypocritical game of "state of Oregon VS person"

They will utilize science

With references

To display an accurate behavioral impact and an effective solution

Instead of arbitrary money laundering and war profiteering

Maybe they aren't conscious of all the science against them

Why is the DOJ and government so corrupt and uneducated. Thinking no one can see them. While they unconsciously observe others. Like they really don't believe God gave them science to use as a measuring tool? "For your staff and rod give me comfort" (after I walk through the valley of the shadow of death) the rod is not Freudian, it's a tool to discipline, discipline isn't being beaten its discipline to measure, such as the origin of the word canna which also meant reed, and a reed of a certain type and length was used as accurate measuring tool but I'm too impatient to find the references and even if I did people could just assume AI and the government just doctored up a bunch of fake websites and references.

Lots of property theft lately

Arguable America's most valued right/asset

Between 2/24-25/24 Someone at this shelter jacked my Jesus folder, I have like 10 folders from prison and that one was my favorite but

This same shelter may have disposed of my property from last year without notifying me or my emergency contact while i was in prison, and it's a Christian affiliated institution

OSP stole family photos and 100 page of legal work and writings on 7/7/23 and 8/5/23

Ashland police stole my phone

McKenna stole my life's work of documentary, archival, photo, video audio and my grandma ring on 11/20/20

Shira style the ring I found on the PCT

My dad and the Courts stole my identity

I think it's only part back that I should steal your sanity. What more can tip something to the I am an aspiring poet. Please excuse my roshak language and increase self discovery. Love is plenty in its multitude of forms. Discovering true love though, amidst a veil, continually striving. The word is dead, or the word is living.

Fb right to view files_240226_055903

We all deserve the right to view all our own FBI AND CIA files (and all lost internet records, emails, every record on you). Because if they're creating a character of me, and I don't have access to view it and change the behavior myself, they'll just keep perpetuating a negative storyline. Records are more powerful than memory. And if someone else has more records of you than you have of yourself, they can make you out to be someone different because no one can know you better than yourself. No matter how many parents project themselves onto their kids and no matter how much psychology or science they think they know, you will always know yourself better (Jeremiah 31:31)

Thanks McKenna for the identity crisis, it's a great piece of art. I hope you and your friends are having fun making fun of my awkward teenage years and things that were my responsibility to keep private but which I had yet to expect someone to be so cruel as to take something I spent my whole life doing. That and my daughter too but she probably picked up the spiteful energy you had in your youth, always frowning at

camera cause your dad couldn't spend the time to teach you how to ride a bike. Lots of things for an identity crisis. Yay for support networks.

Paragraphs

1. Homeless attention problems
(scatter brain/ short (greater need not

A. Solutions used for adhd and

2. Gold fish attention statistic

3. As an influencing factor in the
development of depression. (Building

(each idea is a mountain, the longer it
is focused on the larger it grows))

4.

"Santa might not be real, depression
is real"I've heard it said, "the greatest
trick the devil ever did was to
convince us he didn't exist"

But i would say, more importantly,
what the original mlk said (who helped
church reform): Do you know what the
Devil thinks when he sees men use
violence to propagate the gospel? He
sits with folded arms behind the fire of
hell, and says with malignant looks
and frightful grin: "Ah, how wise these
madmen are to play my game! Let
them go on; I shall reap the benefit. I
delight in it." But when he sees the
Word running and contending alone
on the battle-field, then he shudders
and shakes for fear."

And so when a whole education system and culture promotes violence, profits off warfare and encourages it. You start to see, the human is not violent. Violence is conditional. Lack of resources, greed, etc are all conditioned traits, not genetic or inherent (while statement on violence 1989)

Until the state actively pursues a culture of peace education and rough framework laid out in 1999 (declaration and resolution, program of action) then the state is complicit in all violence.

It can no longer persecute individuals while neglecting the systemic conditions which wire the continual disease and perpetuation. Especially its responsibility towards

PCT day by day August 7 to August 30

1. 1736.5 start

Started on a wim, thought, will, wonder how far my spirit can take me.

1742.1 Hyatt bridge ...6

They call me berry queen because i take so much time to eat all the berries

Dragonflies everywhere, slept close to the lake

Meet jail bait, "f they were trying to take you away, id help you out. They do some ducked up shit in there"

"I'm never going to jail!" He runs away

2. 1756.2 piped spring ... 14

Whatever steals attention from me and suds

Territorial arguments reflect fractal/ international/ colonist narcissism to dominate beyond their region. Asia was there first and yet had to move to his "elite site" to not be cramped. I called him an Elitist and he smiled in surprise like i was dementia forgetful patients by and already forgot him. He didn't believe i he up there, nearby commune. Well, i an a weirdo

Next day meet the bean babe at spring

My talking about berry queen gossip (who eventually said, "i am no queen" after my wondering/ waiting/ motivation for her, and the image that did catalyze, but was never fulfilled (a woman)

This is the bean queen, or bean babe. My venting about berry queen boyfriend drama

"I guys that was it, just one chance by the stream. I don't want to be just a sex toy.. well sometimes"

"I wanna be over and over with the same person" (messing up transcript/ translation)

"Yeah i been with her since the start in campo"

...lol

Wash face in poop irrigation canal, "that's what you told me!" (I was too impatient apparently for him to just say there is clean water 100ft further.... "squirrel" , "did you cut yourself?"

Hated his observation/ jealousy

3. 1764.3 mountain shelter, pusher, big money, ... 8

Magical pusher popped a home in my bag because i was ignoring him in attempt too accomplish needs.

"Now, Just paint it" he said intensely eyeballing me brushing his sticky adhesive repair liquid on the tear hole water bladder/ camal back

"Just keeping you in the straight and narrow" (i actually thought he wasn't helping so much, or was quite suspicious that he happened to have the very tool i needed and that the hole popped in such a way. As if he had an investment in my success and the likelihood i gave up on my own salvation from Oregon slavery would increase if i did not have a working water bag. So he did intact keep me on straight and narrow even if my being stoned and magical sprouting of hole was the curvey and wide (antithesis to straight and narrow)

First meet Prophet after pusher leaves (who i also see at crater lake surrounded by 2, who got his name for finding amazing "chosen"spot (played into inner earth quest/ theories such as newzealander named Dreamland who i met after maud dib at ponds)

Prophet shared peanut butter and tortillas and dates which was a beautiful god send, after eating a can of chili which expired august 2017 or was it 2016

Interesting date in my relationship with McKenna...

4. 1774.3 fish lake ... 10

Girl by name of "Cat" moons me (decided to piss advice me but assistant my camp spot was hidden, i

was just like "hey im right here", "is there anyone else down there with you?" "Nope, just me"

"Well now i have to find a new piss spot"

"Well..."

5.1800 ? Deer lake, chef, popeye, cleopatra ... 18

Chef passes some ganja

Long day, passed hikers just below devils peak taking picture of tiny frog bloom on trail. I accidentally stepped on one.

6. 1782.5 Twin ponds where met maud dib ... 8

Good ganja wrapped in tin foil hw saved since sierras, gifted to me, great stoned hi, felt extreme peace on overlook and sensed a friendly witch troll cackle from Nicole

8. 1822.7 mazama, beans Japanese... 4 ZERO DAY wonderful day

9. 1907.6 shelter cove, boots n bo n prince charming n rainbow repair dude...

Find 6 pack of ciders kombucha 8% left from night before, father time blesses me with tobacco and a wink

Also find enough food. Chocolate oats n more.

Also find 2 smokey bear wildfire bottles to replace my plastic bottles getting over used

Criticize wild cheryl stray throwing her Boots, then realized i prefer tennies

1911.8 lower rosary lake, chestnut ... 4 becomes 8ish (ZERO DAY) - accidentally went south way (west) at the pass and upset break fire tape, sir down n smoke bit

Hiking by moonlight

Another hiker at night, I thought i was the crazy one

She giggles on her way south as i continue by moonlight

Next day magical experience with birds

Prior night mocking a stressed owl/ screech

10. 1791 sky lake

Dragonfly and horsefly implant suspicious find. Squeeze horse flies belly to drop its hold on the dragonfly that had a broken back

2 trail magic back to back afternoon arriving and next morning departure

200m apart.

Secret job for nike

Kid to be a air traffic control

This dependence not only exposes us to potential contamination and disease (as witnessed during the COVID-19 outbreak) but also supports unethical labor practices in countries where modern slavery is prevalent. Our current system fails to protect us during emergencies such as disease outbreaks or blackouts, leaving many vulnerable and without access to essential resources like water, air, food, clothing, and shelter.

A chain reaction of silencing breath, told me i was breathing too loud, lost myself.	2. To address this issue, we must require our city to research, develop and maintain self-sufficient backup systems(1,2) that can meet citizens' basic needs during major disasters without compromising our local environment or health. These systems should be designed with the capacity to function independently of external aid or resources.
		According to the United Nations Office for Disaster Risk Reduction (UNDRR), cities that invest in disaster risk reduction measures can prevent significant losses both in terms of lives and infrastructure (UNDRR Report 2019). Moreover, a study published by the National Bureau of Economic Research indicates that increasing local self-sufficiency can reduce vulnerability to global supply chain disruptions (NBER Working Paper No. 27439).

By mandating these changes at a city level we are not only safeguarding our community against future crises but also taking an ethical stand against exploitative labor practices abroad.

Please sign this petition urging our city officials to prioritize local self-sufficiency through the development of emergency backup systems.

Thank you for your consideration.

needing no outside help in satisfying one's basic needs, especially with regard to the production of food

(2) backup systems include but are not limited to: clean water, food, shelters and essential tool production and delivery systems not reliant on electrical or petroleum powered mechanisms. Some possibilities include but are not limited to harvesting natural gasses from waste systems and incorporating gravity plumbing wherever possible. A

Police report filed_240304_081359

I've been patiently waiting for staff to check their security footage to see my property taken from under my bed or off the table while I was backing up folders, writings, copyrighted materials, etc. But now I'm worried they are taking too long and may try to overwrite the security footage even though I informed them of the theft on 02/25. This isn't the first time my property has been stolen here but this time it was in an area with surveillance footage. 1. Wrongful Death

But I had even assumed they did and waited until I got out. How could I confirm he is real or not? They could surround me by actors... oooh the paranoia, sometimes you just gotta trust, but it's prefer to collaborate and do work together, trust is shown in action not blind obedience. It's a two way street, working together every day to maintain the trust. Is not just a one and done thing.

751am need to pee, haha, oh to maintain a running record of thoughts may form much "garbage" of one so thinks of themselves such way. But so limited to what one can write in what time when do many other things are to or possible of being conversed at same time. Maybe some day in the future they will have the technology to record all thoughts (60k+ per day depending on person) and to wrongly assume that the thoughts that get recorded are the main personality or even one at all of the writer is presumptuous. Some writers have agendas and specifically spend time for a specific purpose, "consciously" or not, to claim one or the other is in

disregard to the mysterious nature of the matter. Where did it all come from and where will it go?

...

Okay Jamie and Tony are involved now Tony just let me view the security footage and was expecting me to be lightning speed to which I responded "I'm fast but not that fast, never used realvideo (program) but have used Adobe premier pro and quite a few others could probably do it in less than 30 minutes."

This conversation happened at 810am

We will see how it develops, Tony replied that it was Pat's computer and he would get him in due time.

Which is much better than filling a police report and so unexpected, now thank you.

810am Seal just left, short "speedy Gonzalez" and I correctly identified 2 of his races, both Irish and Spanish and one other, maybe German.

"Ethical issues!" Was the response to, "oh well I can have it on my person but not in my system" when responding to our accepting the trade of a half ounce of Marijuana organic native grown. From a man who looks familiar, grew up in Eugene.

Linda Grey put rat poison

Seventeenth of February (didn't get date)

Cat Grey said (she is on video wearing grey hoodie today)

If that's her real name, photo taken..

She Said a lot of gross things to me but if it's true that Linda grey gave her grandma rat poison. I need to record all conversations. I told her I didn't believe her because she didn't respect me saying "no thank-you" three times for a vape. I called her a tempter for not respecting my no. Like the doctors who don't provide consent or alternatives. She was lying. People think not looking in eyes is lying. But like I've written before if someone forces you to look in their eyes while hurting you, u stop trusting that eye contact means anything. Almost all lawyers and politicians have great eye contact but are not actually seeing you or respecting your rights.

They see their imagination of you

Their projection of you

Like cat who said "you smile like this for this reason" she should just become an inquisitor and go back hundreds of years to commit crimes all over again, in the name of God and the church. But actually, judges are doing that to this day.

Just met Alan Hamilton nice "Sherlock holmes" shirt"his words haha very friendly guy from Texas family barretts. I complimented his Oregon button not the shirt but i do like the shirts big pockets. He needs the double hat to be sherlock and a pipe

I guess it's just hard to accept that what I was assuming about Cat was actually true. That she is likened or legit deep state provocateur, but I know how to respect space and boundaries. And I apologize for any audio correct errors which may distort this completely. Writing fast and emotionally is not effective for anyone to read accept the author themselves in their own time. Preservation of record and security are a necessity to keep other opinions from putting thing into others mouths, out of fear. We need to stop the revelation and persecution, I engage in it systematically after venting my personal experience without giving time to review. In a way this makes the running record extremely dangerous to open-source especially without one's explicit and informed consent before hand.

...

We are all mediums healing or reinforcing, simply dealing with others...

People don't understand how you can feel like love is fake or you can't always embody it or believe in it especially when your reputation has been tainted.

And she wants me to put my foot in my mouth to get whatever story out of it she wants to believe.

We are all vulnerable to this.

No one is so beyond this. Record keeping is a good start to carefully examining this. I would imagine I am a bit better but to head into a story with distrust will in fact effect the outcome and your interpretation of it especially when words are not distinctly made or heard or collectively understood and agreed upon.

A detective can try to self confirm anything, but without real evidence and simply taking someone to court based off your distrust in human nature (reference to Seville statement)

I believe my story is meaningful and magical. And if others saw it without growing up in my shoes they could take it to be weird, stupid, awkward or anything negative, they could also understand the opposite, more positive aspects of trusting a bit. But most people should work on resolving their own ethical hypocrisy's and studying ethics, philosophy, global issues, footprints, cause and effects. I have been privileged to spend time on these subjects, and even if under pressure I cannot recall it all, I know much has stuck and I have...

Cat also said "you smiled that means I'm good"

And I said how do you know I don't smile at everyone

Then she gave me her analysis of when and why I smile.

I learned to smile yo people I'm afraid of as well as those I'm not. I learned to smile at both my mom and dad and as a means of pleasing them. I smile because people find being sad offensive.

"Are you in pain"? (Dad asks, not caring, not that he ever did, it was always, "YOU'RE FINE" and my medical record proves this because he never allowed me to see real doctors. Conflict of interest. Proof of this.

And tons of people trust my dad like they trust many doctors who can speak gently and give them the drug they want.

And those doctors believe they are good people for giving things away without thinking about life, ethics, time.

Slowing down in my anger at those that would love to trust my dad

But "even honest people make mistakes"

Trust is a daily practice not a one time thing.

And to feel persecuted on certain sides will change one who is sensitive to predatorial gaze and one's face as self protection and cannot be interpreted unless one strives hard to understand the whole human experience in its diverse and multiple/infinite forms.

To study consciousness and how the environment can unconsciously react and vice versa, I'm sure some scientists have researched this I'm depth and I would love to have the tools to measure and record and give my full opinion with people who are not strongly either way. Neutral parties are hard to find, and maybe impossible? To be fully neutral is like a form of perfection. We might get close but never like that.

Rights to a full transparent detail on whose watching you, so they don't have the upper hand. I'm sure I could find just as many or more contradictions, failings, etc if I had the same position as the intelligence community and surveillance.

OUR RIGHT TO DISCLOSURE OF THE PARTIES AND THEIR CONFLICT OF INTERESTS . BUSINESS DEALINGS, SUPPORT NETWORKS, PERCEIVED ENEMIES, (THESE ARE A FEW ITEMS,CATEGORIES TO MEASURE SOMEONES FOOTPRINT : LIKE MEASURING A CELLS INTERACTION WITH THE WHOLE BODY, ITS INPUTS, MAINTENANVE AND OUTPUTS, AND ITS ENVIRONMENTS)

Instead of being humble to acknowledge their own inner demons and inner angels, some will pursue you as one or the other, instead of acknowledging the balance of the 2, classic depiction of a devil on one shoulder and an angel on the other. We are not perfect. And I would prefer not to be around people confirming their own hatred.

I myself have hatred for specific things but I do not actively try to push it on anyone individual especially if they are not to start it or I do but in my own writings.

I am allowing myself to self discover and anyone not of the highest quality of truly ethical living is only going to disturb the results.

I am not of the highest quality of ethical living yet, but I am working and in progress to attain the best space for myself. Which I have just left a hell hole (prison) and am still in one with a lot of discomfort and disease but it is a step up and manageable and will take time for me to build the environment I can excel in. These things I understand. I want to help build this environment and not be like those who wish to target individual cancer cells instead of the cancerous organ. We need to resolve the causes not the effects, the source, not the results..

And my face twitches because I am not fully able to exercise or get my blood and chi to all areas.

Maybe huntingtons is similar.

I am still open minded to the fact his disease is real (isaac) or maybe the result of a multitude of inharmonic environmental and lifestyle avenues.

It is a good undercover position, and yo try to determine if I'm good or not by the Tobacco I share is to head down the wrong road. Empathy is the right path, understanding.....

And the people who are most hurt by those they loved will work extremely hard to confirm others can't be loving either. And sadly the one trying to embody our live love will be surrounded by those who deep down want to believe in it but will really have a journey and duration which is based upon their own willingness to themselves be humbling and introspective. I know my triggers and I am getting better at resolving them. Proper conflict management is often a long and difficult road when the authorities - by whose design the individuals are operating under - are blinded by their own selfish interests. Every nation has selfish interests I may claim and am willing to explore the ones who believe they are truly net zero impact or a positive impact. This can be measure once we agree on the values of life and the values of atomic, molecular, cellular and multicellular objects. Which much has been discovered and we can actually weigh the air we believe and the ...

Isaac came into the bathroom while I was tping and laughed as I left. He had no muscle twitching. Him and Kim were judging my story based off my lack of trusting them. If I don't trust

you, how can we get anywhere. If your incorrectly and impatiently judging my motives or actions (which even Socrates admits to not knowing, so how can we, with such lack of study in the matter - compared to a father of philosophy - have any assumptions we could know more. I believe I may know more after reading not just his but many who came after.

I had the perception that he like cat thinks they are wholly good and are weighing their own judgment of themselves on my behavior, which is to miss the point. To use me as a tool to measure your own goodness without informing me of such or of using my own information against me without giving me time to complete it to the degree I would find acceptable.

She judged my eating habit

Of fast eating to imply a personal disorder instead of my awareness and grief for a global disorder. She spoke of such matters. These are disgusting and limited implications. More can be expanded upon. My own passion makes me look strange to people, because I care so much. If I didn't care I wouldn't even be able to write all of this. What would be the point? (And it's not even hard for me to imagine other points but that to me is not what I believe, because I do not believe we are built to be motivated by such things, although I'm sure many or some are and maybe quite often. Many authors create their own stories. I feel much different as a documentarian and archivist and do strive for understanding even the opposing views but they obviously trigger me. To challenge my deepest beliefs.

So I will try to work for neutrality, to end the dualism, to create a neutral environment.

It's not easy to eat when one's grieving

But to improperly interpret one's own grief is horrible.

Which yes I admit I do and others do..

To lock my own lips and imagine others demonize me as a snake. I progress through it by saying that's okay and encourage a positive form of their negative image.

Or is those who push the negative ideas on people the real problem. To demonize another so that they have to learn to see it in a positive light, is to reinforce the very thing the demonizers claim to be against.

And so Jesus takes the higher ground because he did not demonize the poor and downtrodden. I am no where near Jesus level but I understand that logic. To persecute only reinforces.

He persecuted the system though.

That was working against him and society..

See how much cat naturally inspired me to write by triggering me.

And then who just walked up to me just now as if what just happened didn't really happen. And how blind I am to being betrayed by people who would get close to me just to distort my story.

So I need to just "push" ethics onto people and turn them inward to look at themselves instead of allowing them to push so much on me.

Such as their participation in a corrupted system...

The contradiction at the heart of America: James Baldwin unveils, the founders and modern claim to Christianity amidst racism and slavery

The schism is intrapersonal and interpersonal, it is intragroup and interpersonal group. To end the schism we must unite the hospitals, churches, schools, courts, government, businesses do that we can build a safe and healthy environment that naturally encourages, reinforces our highest potential and innate desire for collaboration, bonding, fellowship.

The contradiction at the heart of America: James Baldwin unveiled, the founders and modern claim to Christianity amidst racism and slavery is a great and horrible contradiction.

Many of our own contradictions are hard to discover without a constant record. You can poke holes in anyone's claims by a constant surveillance of their own person vs their words and beliefs.

The system of record keeping and surveillance has advanced to a level where we can become aware of our contradictions and help ourselves and others if we so choose desires to self mastery and transcendence.

Also, as even the old testament Jeremiah 31:31 speaks on the new covenant fulfilled by Jesus, still many will preach despite our own inner knowledge of these matters. And it is good to continue conversation and records for evolutionary purposes but to also respect other cultures by paying heed to Jeremiah 31:31 and not forcing them to hear your ideas on god, good, the universe. Love. Unless they so choose.

The barrier between hate speech and free speech is crossed when one forces others to hear them, allowing them no escape from obvious hypocrisy. So I prefer the written word to give people the time and safe distance to discover for themselves.

But still literacy and math is low in America and to participate in these matters we must encourage these traits so as to not re invent the wheel at every conversation.

Definition of evil "selfish" or "negative footprint"(scientific categorizing

As a concerned citizen, I am deeply troubled by our reliance on the global supply chain for basic necessities. This dependence not only exposes us to potential contamination and disease (as witnessed during the COVID-19 outbreak) but also supports unethical labor practices in countries where modern slavery is prevalent. Our current system fails to protect us during emergencies such as disease outbreaks or blackouts, leaving many vulnerable and without access to essential resources like water, air, food, clothing, and shelter.

To address this issue, we must require our city to research, develop and maintain self-sufficient backup systems(1,2) that can meet citizens' basic needs during major disasters without compromising our local environment or health. These systems should be designed with the capacity to function independently of external aid or resources.

According to the United Nations Office for Disaster Risk Reduction (UNDRR), cities that invest in disaster risk reduction measures can prevent significant losses both in terms of lives and infrastructure (UNDRR Report 2019). Moreover, a study published by the National Bureau of Economic Research indicates that increasing local self-sufficiency can reduce vulnerability to global supply chain disruptions (NBER Working Paper No. 27439).

By mandating these changes at a city level we are not only safeguarding our community against future crises but also taking an ethical stand against exploitative labor practices abroad.

Please sign this petition urging our city officials to prioritize local self-sufficiency through the development of emergency backup systems.

Thank you for your consideration.

[] Add "He heals by beelzebub" (MATT 12:24: But when the Pharisees heard it, they said, "It is only by Beelzebul, the prince of demons, that this man casts out demons.") Rather than follow the evidence to a logical conclusion, Jesus' bitter critics choose a more drastic, stubborn opinion. The Pharisees declare to those nearby that Jesus' ability to order demons away came from Beelzebul, the prince of demons himself. Beelzebul, which means "master of the house," was another name for Satan or the devil. In short, the Pharisees were accusing Jesus of sorcery, the practice of accessing the power of evil spirits for specific purposes.
